2015 PRODUCT CATALOG

Dear Valued Business Partner,

Madison continues to implement exciting changes across its business. Innovation has been the driving force behind these changes. Whether it is a new business tool, a new business process, or a new product, Madison is dedicated to providing the best solutions to our valued customers. Our award winning SPARKS Innovation Center™ has delivered many new, innovative and labor saving product solutions. These products were born in the minds of end users throughout the electrical industry, and therefore, deliver immediate value to the Electrical Wholesale channel.

I am proud to introduce this latest edition of our product catalog, which highlights these new products along with our entire product portfolio. I hope that you find this catalog to be a useful resource. Should you have any suggestions on how we can possibly make this tool, or any aspect of our business, better.....we would love to hear from you!

From all of our dedicated employees to you, I want to thank you for your continued support of Madison Electric Products, Inc.

Best Regards,

Brad Wiandt

about Madison Electric Products

Madison Electric Products provides over 2,500 field-tested and field-created products developed by electricians for electricians. Headquartered in northeast Ohio, Madison Electric Products boasts a customer service oriented coast-to-coast network of sales reps and distribution centers.

Madison Electric Products is built upon a legacy of product innovation, an ongoing commitment to superior customer service and product quality, and a dynamic and progressive management team that establishes open, one-on-one relationships with company partners, including customers, distributors, manufacturers, and inventors.

HISTORY & LEADERSHIP

Madison Electric Products was founded in Cleveland in 1929 by Earl Atkinson, an electrician and inventor of the Madison Strap, one of the electrical industry's most relied-upon and favorite products. At the helm of Madison Electric Products today is President Brad Wiandt and his team of experienced electrical industry veterans.

OUR BRAND

Madison Electric is revolutionizing the electrical distribution market with new attitudes, new processes, new procedures and new products – growing smartly into a spirited, innovative, inspired organization built on the innovative legacy of its founders and the on-going commitment to deliver the highest quality products to customers in construction related trades, OEM and building maintenance. Over the years, Madison Electric has led the industry with field-tested and field created products developed by electricians for electricians.

Today, Madison Electric enjoys a well-deserved reputation as the innovative source and industry thought leader for product development. Our past is the foundation for our future, where a second to none customer service approach is reflected in everything we do. From the way we deal with our distributors and contractors, to the direct, one-on-one relationships we maintain with our manufacturing partners, we work hard to guarantee success, improved quality and superior performance.

New Southeast Distribution Center atlanta

Madison Electric chose Duluth, GA for our third distribution center to provide superior service to customers nationwide.

Our new 55,000 square foot distribution center in Duluth, GA will house more than 2,500 product SKUs. This facility location will significantly enhance operational efficiency nationwide.

“The opening of the new Southeast Distribution Center is yet another example of our ongoing dedication to continuous improvement at Madison Electric Products,” explained President

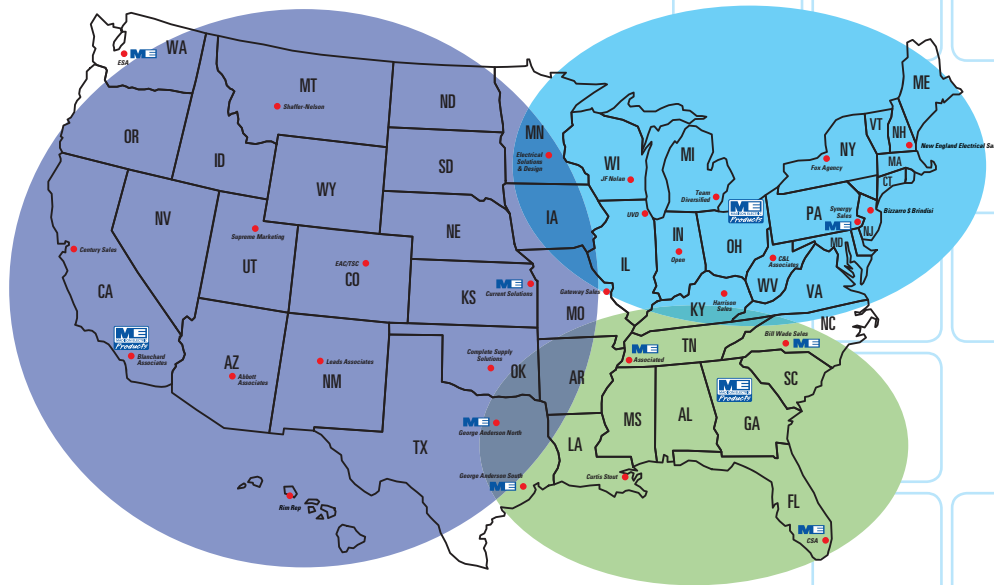

of MEP, Brad Wiandt. “More importantly, this new facility reinforces our unyielding commitment to providing the highest level of service to our customers. While this initiative had a specific focus on our valued customers located in the southeastern quadrant of the U.S., this facility will help provide logistic efficiencies throughout our entire U.S. network.”

This new location allows for next day delivery to most customers, as well as same day service to the local area and standard 1-2 day delivery for most of the southeastern U.S.

“We are glad to be in Atlanta,” explains MEP’s Director of Operations, Kirk Pace. “This new location was strategically chosen to enable us to make service to our customers as simple as possible.” We anticipate shorter transit and lead times, in addition to higher fill rates and market control.

Committed to service, the new distribution center compliments MEP’s existing facilities in Ohio and California and features superior technology. With a radio frequency technology warehouse management system, MEP can instantly track customer inventory and effectively manage operations. The high-efficiency warehouse is also wire-guided, increasing speed and productivity, reducing accidents and allowing operators to concentrate on superior pick logic.

Our newest DC in Atlanta, GA joins our headquarters in Cleveland, OH and our west coast DC in Rancho Cucamonga, CA. Committed to service, we now have locations covering the country, providing quicker service nationwide.

At Madison Electric Products, innovation is what we do. But we couldn't do it without you.

You're out in the field every day. You know what works and what doesn't. And we're sure that at some point or another you've said to yourself, "I have a great idea. I could do this better."

If you're looking for a partnership with a company that thrives on product innovation and relationships with electricians just like you, visit our Sparks Innovation Center online. It will take you to a simple questionnaire to get things started on submitting an idea to us.

There's no commitment. While we can't guarantee that your idea will make it to market – let's face it, not every idea will – we can guarantee that we will:

- Respond to you as quickly as possible
- Consider every idea submitted
- Appreciate that you took the time to submit one!

Innovating the Industry Through Collaboration

Madison won the 2013 tED Best Event Award for hosting the first-ever "Innovation Roundtable" at the Electrical League of Ohio's 2012 Electro Expo. During the roundtable, 40 forward-thinking manufacturers, distributors, reps, electricians, trade association representatives and media came together to reflect on the electrical industry's current state, existing challenges, emerging technologies how to work together to overcome obstacles and better the industry as a whole.

Sparking Measureable Results Through Social Media

Combining a company blog and e-newsletter with Facebook, Twitter, LinkedIn and Google+, Madison continues to trace measurable results back to social media. These efforts earned us the 2013 tED Best Event Award for Best Digital/Social Media Campaign. For the third year in a row, social media fueled an increase in submissions to the Sparks Innovation Center, as well as both new product and overall sales. Madison's ongoing commitment to social media continues to help drive the company's reputation as an innovative, forward-thinking electrical product manufacturer.

Madison's Cut-in Snap Lock named to the 2013 EC&M Product of the Year Awards!

Madison's Cut-in Snap Lock has been selected as the Connectors and Fittings (Cable) Category Winner for 2013! EC&M's Product of the Year Awards annually recognize the most valuable products introduced to the electrical market in the previous year. We're thrilled to be included among the 46 Category Winners selected for 2013.

Accolades for Madison's first-of-its-kind approach to product development continue to pour in.

Madison's crowdsourced approach to product development -- the Sparks Innovation Center -- recently received a 2011 "Spike Award" from Kalypso LP in the Manufacturing/Other category. The Spike Awards celebrate forward-thinking innovation that leverages social strategies, processes and technologies to improve product development.

The newest innovation for pulling wire!

In today's high tech world there is a lot of expensive, fragile cable being pulled above drop ceilings. A snag can not only ruin the cable but also the ceiling, creating delays and extra costs. That is all a thing of the past with Madison's new Stingray. Simply remove the ceiling tiles and snap the Stingray into the corner of grid. That's it! You now have a safe and effective chase to run your cables. When you're finished simply pull the Stingray's tail and slide it off the grid.

- Protects expensive and fragile cables
- Protects ceiling from twisting and marring
- Prevents cables from tangling with the ceiling, saving time and labor
- Smooth interior creates an almost frictionless chase
- Side slit allows for easy cable removal at any time
- Fits 1" standard ceiling grid

SmartTools

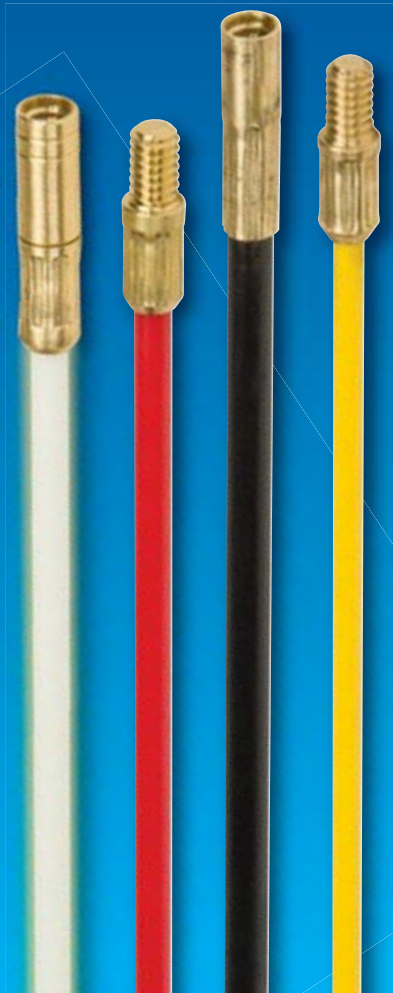

SUPER ROD

True innovation designed by you.

The real innovation behind Super Rod products is that they don't just route cable. These are multi-purpose tools that allow installers to inspect, illuminate and retrieve with a range of unique time saving attachments.

In 2009 alone, the Super Rod system saved a massive 9 million hours to the electrical industry, worth over \$650,000,000. Surveys have proven that the payback time for investing in a Super Rod set is very often after just one job, reinforcing the fact that anyone who uses cable should be using Super Rod!

- Adoxim material eliminates splinters
- Many attachments available
- 8 pt crimp for a stronger hold than glued on ends
- All pieces are interchangeable

The perfect choice for flat screen TV applications and home theater centers.

The 5 and 6 gang Smart Boxes are perfect for your home entertainment needs. These products offer additional built in features such as removable nail tabs used for metal stud mounting, removable interior mounting blocks to allow for more cubic inch in the box, built in mounting blocks on the top end of the box for vertical mounting, 1/2 inch knock outs for blue tube or PVC conduit connections, and finally movable, low voltage wall dividers to allow for mixed voltages in the same box. Smart Box is the perfect choice for flat screen TV applications and home theater centers.

- Largest volume offered in device boxes
- Heavy duty mounting screws supplied
- Vertical and horizontal mounting
- UL approved for single screw mounting, extra support bar not required.

ROMEX® is a registered trademark of Southwire Company.

The powerful new way to pull wire without breaking a sweat!

Power Pull-it is a compact and portable wire pulling device that utilizes your cordless drill to efficiently pull wire, and dramatically reduce hand-pulling fatigue and injuries. Just attach the pull line to your drill, and let it do all the work for you. Made in the USA, Power Pull-it's sturdy construction includes a precision bearing assembly, and requires no anchors. It's the fast, easy way to pull wire, while saving on labor costs, and reducing pulling fatigue, and hand injuries. Includes a spare line sleeve and tool pouch.

- Saves on labor costs
- Reduces pulling fatigue and hand injuries
- Precision bearing assembly
- No anchors required

Work smarter!

The Tracer Tool accurately and easily traces 2" x 3" metal old work box outlines on surfaces for proper installation in walls, centering the box to match any existing. Integrated vertical and horizontal levels and center point location mark allow for quick and easy placement of the tracer.

Made of durable plastic, the Tracer Tool has a rubber backing for turning ease and pliability to surfaces when tracing. Small and easy to use, it works both vertically and horizontally with bull's eye accuracy. Patent pending.

- Bull's eye accuracy
- Works vertically and horizontally
- Durable plastic with rubber backing

NEW INLINE INTERSYSTEM BONDING BRIDGE

Provides a dependable method for grounding and bonding for electrical systems

Material: Zinc Die Cast

Certifications: cULus Listed

Features: Easy installation. When used with conduit, it provides protection against damage and theft of the main ground. Main ground conductor is isolated from communications lines. Incorporates six (6) terminating points (2x the amount required by the NEC). Eliminates creating holes in building that could allow ingress of water. Mounts to enclosures, conduit bodies, and inline with conduit. Gangable.

INTERSYSTEM BONDING BRIDGE

Terminates utility grounding conductors such as power, telephones, cable, etc.

Material: Tin-plated Aluminum, Polycarbonate

Certifications: Meets requirements of 2008 NEC Article 250.94

Features: Connects directly to the grounding electrode with a lay-in style lug. Integrated mounting holes provide quick, easy and compact installation. Constructed of corrosion resistant aluminum and tin-plated for maximum conductivity. Paintable polycarbonate cover for additional protection.

Double Snap Lock

The latest innovation in electrical fittings!

The Double Snap Lock MC connector provides significant labor savings when installing metal clad or armored cable to steel boxes or enclosures. No tools are required when assembling to the cable or the box. Simply snap the cable to the fitting and snap the fitting into the box. The Double Snap Lock can be easily removed without tools and is reusable.

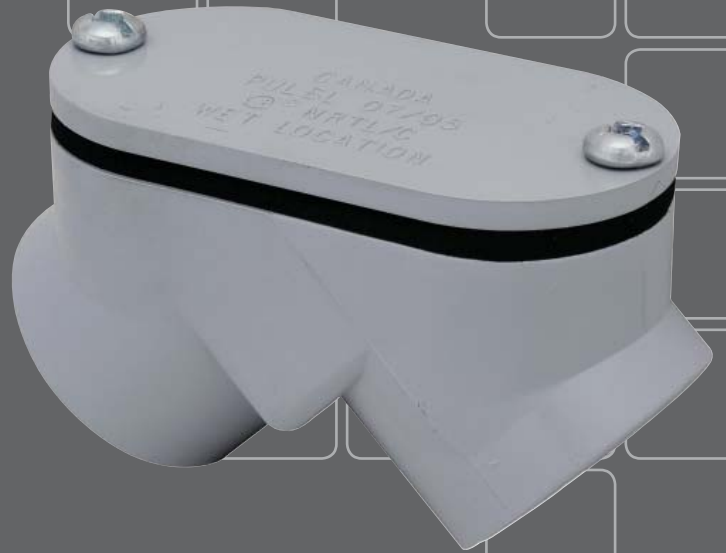

- Faster installation, no tools required
- One piece, square grip design
- Easy removal & reusable

When running conduit, having inferior conduit bodies can grind a project to a halt. Breaking or coming loose due to poor fit can cost valuable time and labor. All of Madison's conduit bodies are made from high grade aluminum or malleable iron for Rigid conduit, and aluminum for EMT. Madison produces quality at an affordable price. Available in all conduit body types and with a wide range of conduit sizes we have exactly what you need to get the job done.

CLIPit™

Now supports **MC/AC**
and low voltage **cab**le

Keep those pliers in your pocket!

Clip-it™ makes installing MC Cable a snap. No more reaching for tools to secure your cable. Madison Electric Products makes it fast and easy. Our patented rifled polycarbonate design will hold MC or armored cable 12/2 through 10/3, eliminating the unsightly sagging you get with other supports. The Clip-it MC products are made from durable hi-impact polycarbonate, and can be used universally.

- Save up to 40% in labor costs
- Sturdy Polycarbonate
- Fits MC/AC Cable 12/2 thru 10/3

nipples, elbows & couplings

Madison Electric's nipples, elbows and couplings line is an extensive compilation of quality products. Just take a look to see for yourself. All of our UL listed nipples, elbows and couplings meet exacting standards rarely seen in the industry. We give you peace of mind that when you purchase from Madison, you are getting exactly what you need.

RIGID CONDUIT NIPPLES

Your source for ideas, insights & innovation in the Electrical Industry.

hangers & supports

Innovation. It's what Madison is all about. Check out our Madison Strap, the product that started it all. Invented in 1929 by our founder Earl Adkinson, Madison has been on the cutting edge of electrical products ever since. Our newest support innovation for the 21st century is the UL listed Clip-It. All of our hangers and supports are made of high quality materials and produced to exacting standards. From Madison Straps to Clip-It and everything in between, Madison has the hangers and supports you need to get the job done right!

Ladder Horse is a universal tool.

Similar to a machinist v-block, use the Ladder Horse for supporting, cutting, trimming and sawing. It works anywhere your ladder works.

Place the Ladder Horse on the support across the back of your ladder to stand up and cut.

Cut EMT, Rigid, PVC and even threaded rod. Increase your safety by letting Ladder Horse do the work. It can support fixtures while you get your footing. While standing up, cut drywall, and similar materials upright, using a T-square for a nice straight edge.

- Solid aluminum construction
- Marked measurements
- Works with most step ladders

Grounding & Bonding at it's best!

Madison's done it again! Our new Inline Intersystem Bonding Bridge will change the way you bond your intersystem bonding conductors. It provides a dependable method for grounding and bonding for electrical systems. Typical applications include communications, solar, cable, and transmission lines. When used with conduit, it provides protection against damage and theft of the main ground.

- Designed for indoor and outdoor use
- Incorporates six (6) terminating points (2x the amount required by the NEC)
- Main ground conductor is isolated from communications lines
- Easy installation
- Eliminates creating holes in building that could allow ingress of water
- Mounts to enclosures, conduit bodies, and inline with conduit
- Gangable

Inline Intersystem Bonding Bridge

With a wide range of sizes and styles, Madison has the flex and liquid-tight conduit that you need. From trade sizes ranging from 3/8" to 4", no job is too big or too small. Made from the highest quality steel, aluminum and PVC, Madison's flex and liquid-tight conduit come through each and every time.
