SmoothGlideTM

REGISTERS & GRILLES

High quality steel or aluminum components.

Rivets installed AFTER assembly for the smoothest operation.

Blade & linkage components individually powder-coated BEFORE assembly.

The decades old practice of painting a register and damper after it has been assembled leads to chipping paint, unpainted exposed surfaces, frozen linkage parts, rattling damper blades, and ultimately... rust. The process saves time and money. It's the best way to build a cheap register cheaply. We can't and won't ever build our registers that way again.

High quality steel or aluminum components.

Easy to use filter grille latch is powder-coated BEFORE installation and requires no screwdriver to open.

Baltimore, MD

Savannah, GA

Houston, TX

Strategic Distribution

In order to be recognized for providing the best service in our industry, we must be able to maintain geographically strategic distribution locations. With the recent addition of our 110,000 square foot Baltimore facility, that requirement has been met.

Maintaining a massive inventory means filling orders at a rate unparalleled in the industry. Our four Distribution Centers are positioned in such a way that 90% of our customers receive their shipment within 72 hours after they place their order.

When you consider that we at TRUaire are delivering the finest quality on the market at competitive prices, the rest is a winning combination for our customers.
