# R-6 DucTite® Insulator

by **M&M Manufacturing Company**

See ICC-ES Evaluation Report No. ESR-1228 at [www.ICC-ES.org](http://www.ICC-ES.org)

## INSTALLATION

**602R6 DucTite® Register Boxes** have **R-6 DucTite® Insulators** installed at the factory and the boxes are then installed as normal. **R-6 DucTite® Insulators** ordered by themselves are installed on **602 DucTite® Register Boxes** as follows:

Place register box on stable firm surface with collar up. Hold **R-6 DucTite® Insulator** with recessed cavity down and align hole with collar on register box. Push the **R-6 DucTite® Insulator** down on the register box until firmly seated against the snap rail flange. When properly installed, approximately 2" of the register box collar will extend out of the **R-6 DucTite® Insulator**. No taping or sealing is needed.

**R-6 DucTite® Insulators** are available for **602 DucTite® Register Boxes** made by M&M Manufacturing Company. For more information see your HVAC-R distributor today or contact M&M Manufacturing. [info@ductite.com](mailto:info@ductite.com)
