# K-SERIES™

COMMERCIAL PACKAGED ROOFTOP UNITS 2- TO 25-TON KG/KC/KH MODELS

UP TO 16.5 SEER, 14.8 IEER AND 13.0 EER

### PRECISE. VERSATILE. SOLID.

K-Series<sup>™</sup> rooftop units are known for precise, dependable performance. And thanks to advanced features and thoughtful product designs, the K-Series is flexible, too, making it an excellent choice for virtually any commercial application.

### K-SERIES AT A GLANCE:

Engineered for installation flexibility, energy-efficient performance and easy serviceability

Gas/electric, electric/electric or heat pump units, ranging in sizes from 2 to 25 tons

Standard- and high-efficiency units available

More than 100 field-selectable options to ensure it meets your specific application

#### **EFFICIENCY RATING**

Up to 16.5 SEER, 14.8 IEER and 13.0 EER

### WARRANTY

15-YEAR LIMITED WARRANTY on stainless steel gas heat exchanger

10-YEAR LIMITED WARRANTY on aluminized gas heat exchanger

5-YEAR LIMITED WARRANTY on compressor

3-YEAR LIMITED WARRANTY on Eco-Last™ coil system

1-YEAR LIMITED WARRANTY on covered components

See warranty certificate for actual details.

### **OPTIONS FOR OPTIMAL EFFICIENCY**

K-Series units are available in two configurations—standard and high efficiency. Either unit can also be made up to 27% more efficient with the addition of an optional, Single-Zone VAV (Variable Air Volume) supply fan. High-efficiency models may also qualify for state and local utility rebates, helping you save even more.

#### QUICK AND EASY TO INSTALL AND SERVICE

The K-Series has several features designed to reduce both installation and service time:

- Isolated compressor for fast, accurate charge confirmation.
- Slide-out blower for quick and easy cleaning, belt adjustment and parts replacement.
- Easy-to-reach gas compartment for quick and easy analysis and service.

#### THE LOGISTICAL CHOICE FOR QUICK DELIVERY

The K-Series is versatile and efficient when it comes to shipment, too. Allied Commercial has wholesale distributor partners throughout the U.S. and Canada, which gives you fast, local access to K-Series equipment. So you get the performance you need, when you need it.

To check availability near you, contact your local Allied Commercial distributor.

### TAILOR THE K-SERIES TO YOUR NEEDS

With more than 100 field-installed options to choose from, the K-Series can provide the exact solution for almost any application. K-Series units range from 2 to 25 tons in capacity, and are available in three configurations: gas/electric, electric/electric and heat pump.

### FIELD-INSTALLED ACCESSORIES

K-Series units include convenient features like plug connections for wiring, panel knock-outs and pre-installed accessory framing. You can choose a stock unit and quickly install accessories, providing immediate relief when you need it.

- Field-powered GFI
- Disconnects
- Economizers with single or dual enthalpy control
- Electric heat
- 50% constant-volume power exhaust fan
- CO<sub>2</sub> sensor
- Return and supply air smoke detectors
- Low ambient kits
- Hail guards
- Coil guards
- LPG conversion kit (gas/electric only)
- -40°F cold weather kit (gas/electric only)
- Combustion air intake and flue exhaust extensions (gas/electric only)
- Blower proving switch
- Dirty filter switch

# FACTORY-INSTALLED OPTIONS FOR FAST INSTALLATION

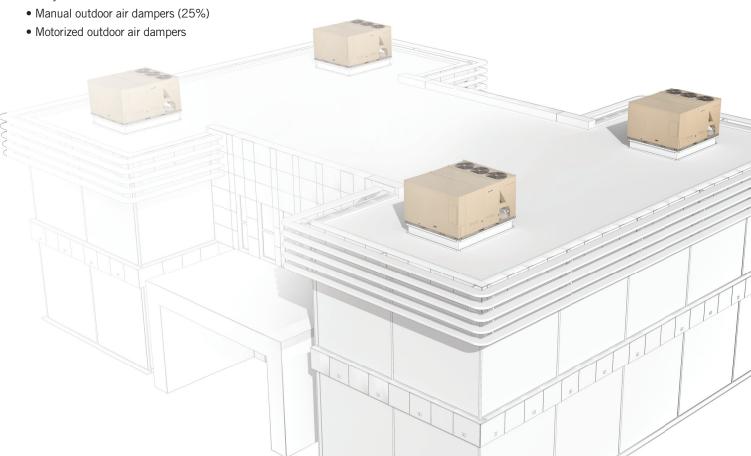

For quick, built-to-order solutions, K-Series units can be built and tested at the factory to exact specifications with these options:

- Single-Zone VAV (Variable Air Volume) supply fan option
- Coil corrosion protection
- Stainless steel heat exchanger
- · Hinged doors

### FACTORY OPTIONS OR FIELD ACCESSORIES

For maximum time and cost flexibility, choose to have these options installed in the field or at the factory:

- Economizers
- Barometric relief dampers
- High- and low-static drive kits
- Heaters (electric/electric only)
- BACnet module

### ADVANCED TECHNOLOGY, ADVANCED EQUIPMENT

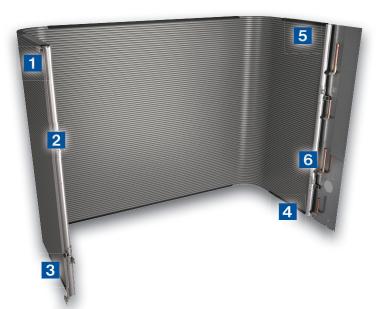

The technologies built into the K-Series<sup>™</sup> units help businesses enjoy lasting performance and consistent energy efficiency, season after season.

## CONNECT TO NEW OR EXISTING BACNET BUILDING AUTOMATION SYSTEMS

All K-Series units can now be integrated with BACnet, an industry-leading building automation platform. Either factory- or field-installed, the BACnet module allows remote monitoring and adjusting of a building's heating and cooling. Digital sensors are fully programmable, providing precise monitoring and control, while optional password protection prevents unwanted temperature adjustments.

### THE ECO-LAST™ COIL. DEPENDABLE BY DESIGN. PERFORMANCE THAT LASTS.

Sheet metal isolators are placed along the top, bottom and sides of the coil and unit where needed, to further reduce points of potential corrosion.

4 COIL STABILIZERS—Securing the coil in place helps prevent movement during shipping to avoid damage.

ALL-ALUMINUM COIL—By using a series of channels, the Eco-Last™ coil system provides a higher primary surface area than traditional round tubes, resulting in up to 52% less refrigerant required to achieve the same level of heat transfer.

# 5 OVER-CORE REINFORCEMENTS—

For added protection, over-core reinforcements on the top and bottom of the coil are twice as thick as internal tubes and do not circulate refrigerant.

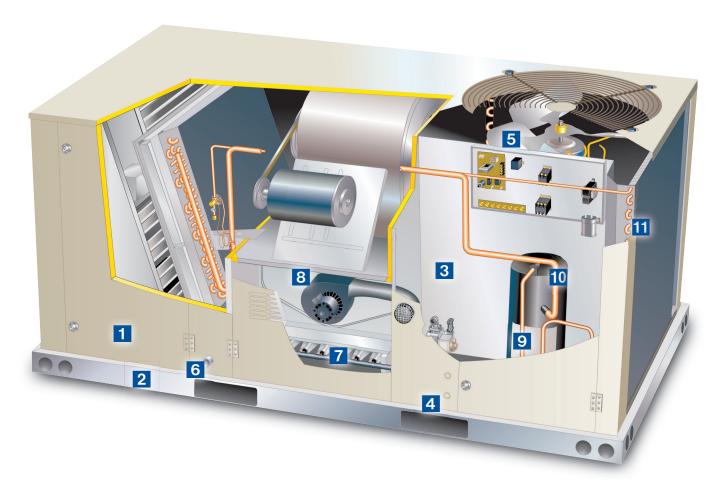

2 COIL MOUNTING ISOLATORS—Rubber inserts help to reduce vibration. Plus, the isolators prevent corrosion by separating the coil from the rest of the unit and eliminating metal-to-metal contact.

**6 BRAZED JOINTS**—The Eco-Last coil uses up to 20% fewer brazed joints than tube-and-fin coils, reducing the potential for leakage.

### K-SERIES™

- HINGED ACCESS PANELS—Factory option provides quick access to components and protects panels and roof from damage during servicing.
- 2 FULL-PERIMETER BASE RAIL (WITH RIGGING HOLES)— Provides greater structural integrity, so the unit is easier to handle when rigging and transporting.
- **ISOLATED COMPRESSOR COMPARTMENT**—Allows performance check during normal compressor operation without disrupting airflow.
- 4 FORK SLOTS ON THREE SIDES—Easy to pick up and transport units from almost any angle.
- **INDEPENDENT MOTOR MOUNT**—Allows for easy and efficient service access without removing the top panel.
- CORROSION-RESISTANT, REMOVABLE DRAIN PAN— Provides application flexibility, durability and improved serviceability. Bottom drain capability also standard.

- T LARGE BURNER COMPARTMENT—Designed for serviceability, the contractor-facing gas components allow for fast routine maintenance and diagnostics.
- PREDEFINED SUPPLY FAN MOTOR/DRIVE

  COMBINATIONS—Make selecting components to meet static and airflow requirements quick and easy.
- SCROLL COMPRESSOR—Standard on all units for reliable long-term operation.
- HIGH-PRESSURE SWITCH—Improves reliability by safeguarding compressor from extreme operating conditions.
- **ECO-LAST COIL SYSTEM**—Uses up to 52% less refrigerant, is up to 59% lighter and has up to 20% fewer brazed joints than typical units (standard on all 7.5- to 12.5-ton gas/electric and electric/electric models; heat pump models use tube and fin coils).
