### Complete Rough-In Package

The OmegaPlate™ includes everything you need, when you need it: a versatile mounting/access plate, high-quality valve with brass elbow connection, protective debris cover, and color clips for hot/cold lines.

Finish escutcheons are available separately

### Fast, Consistent Rough-ins

Quickly and easily rough in for lavatories, toilets, dishwashers, ice makers, or other appliances. Supply lines can be run from above or below.

### Swivel Valve Outlet

Valve outlet can be oriented in any direction, independent of the inlet elbow and incoming supply tube.

### Works Inside Cabinets

Escutcheons are designed to thread onto the plate and hold securely – Perfect for interior walls or inside of cabinet-style lavatory fixtures.

### Professional-Looking Finish

Pre-colored, white ABS escutcheons can be painted to match any wall color. Install the TrimTite™ for a more flush appearance.

### Mounts On or Between Studs

Fasten the OmegaPlate™ directly to studs, or use a bracket to mount between studs. Chrome-plated escutcheons compliment the look of the plated valve.

### Optional Extended Valve

The extended 3/8" outlet valve option is great for applications where multiple layers of drywall are used, or when cabinets are furled out from the wall.

### Replaceable Valve Design

All OmegaPlate™ valves can be replaced with any standard 5/8" OD compression-thread valve.

(see website for valve replacement instructions)

### MiniRester™ Option

For applications that require a water hammer arrester, the compression thread MiniRester™ can be connected directly to the outlet of the OmegaPlate™ valve when installing supply tubes.
