

Deliver Long-Lasting Protection With the Most Versatile Weatherproof Covers on the Market

Intermatic.com

INTERMATIC®

Our durable lineup of die-cast, low-profile and plastic weatherproof covers offers rugged protection in all types of applications, including industrial, commercial, residential and more! Time-saving features, premium construction and an array of customization options make them a welcome addition to any project.

STAY COMPLIANT 2017 NEC Code, Article 406.9 (B)(1)

Intermatic Weatherproof Covers meet or exceed the latest NEC requirements for extra-duty applications and wet locations.

- For the 2017 NEC, all 15 and 20 ampere, 125 and 250 volt receptacles installed in a wet location still must have an enclosure and covers that are weatherproof whether an attachment plug cap is inserted or not.
- A revision now requires all enclosures and covers installed in wet locations for 15 and 20 ampere, 125 and 250 volt receptacles to be listed, and of the "extra-duty" type, not just boxes supported from grade.
- This requirement is now also required for dwelling units as well. The requirement for weather-resistant type receptacles in wet locations is still applicable in the 2017 NEC. This change also provoked changes to Article 590.4(D)(2) for extra-duty covers for all 15 and 20 ampere, 125 and 250 volt receptacles installed at temporary installations in a wet location.
- Exceeds the CEC Section 26-702.
- Standard weatherproof cover compliance guidelines apply only to 2014 Article 314.15.

Low-Profile Plastic Weatherproof Cover Features

Extra-Duty Models Are 2017 NEC Article 406.9 (B)(1) for Wet Locations and Extra-Duty Applications Compliant; CEC 26-702 Compliant; RoHS Compliant

Extra-Duty Low-Profile Plastic

Single-gang covers mount vertically or horizontally

RoHS

New! Low-Profile Expandable In-Use Weatherproof Covers

New Low-Profile Expandable In-Use Weatherproof Covers by Intermatic provide a sleek, easy-to-use alternative to traditional in-use weatherproof cover options. The unique design of the Low-Profile Series allows homeowners to collapse the cover's front window when not in use, avoiding an eyesore on the side of the house. This improves aesthetics while delivering dependable, code-compliant protection for a range of outdoor applications.

New Low-Profile Expandable In-Use Weatherproof Covers Include:

- **Improved Aesthetics** – Unlike traditional covers, Low-Profile In-Use Covers include an expandable front window that can be collapsed to save space when not in use
- **Simple, Secure Access** – An innovative new design provides a no-hassle latch with lockable hasp that can be opened effortlessly with one hand
- **Quick Installation** – GFCI pre-set; keyhole slots help electrical contractors complete installation in minutes
- **Configuration Options** – Available in single-gang and double-gang configurations, as well as standard and extra-duty; select white, gray or bronze color options; single-gang models accommodate both vertical and horizontal installations
- **Code Compliant** – WP7000 and WP7200 Series Low-Profile In-Use Covers comply with 2017 NEC Article 406.9 (B)(1) for wet locations and Extra-Duty applications; CEC 26-702 Compliant; RoHS Compliant
- **Inserts** – Single-gang come with one duplex and one round. Double-gang come with two duplex and two round. All models are GFCI pre-set; no insert required.
