

# FIELDPIECE ACCESSORIES

## Fieldpiece

### Large Deluxe Meter Case

The Large Deluxe Meter Case, model ANC8, is a technician favorite because it handles a lot of gear for an affordable price. It has four pockets in all, including a deep center pocket that holds a combination of 2 full-size meters and 4 accessory head instruments. The ANC8 is a must have upgrade for any technician that has multiple Fieldpiece meters and accessory heads.

#### FEATURES:

- Rugged and nylon construction.
- Padding.
- Durable pockets inside and out.
- Rugged double zipper
- Shoulder strap

### Deluxe Silicone Test Lead Kit

The ADK7 deluxe silicone lead is the optimal way to test most electrical parameters you run into during field service. The kit includes the ADLS2 silicone leads and ASA2 alligator leads plus our all new RCT2 "Molex"-style probe tips. HVAC techs often remove the black probe tip and insert the black alligator lead for an extended reach from ground. When used with our stick meters, the Volts (red) probe tip is inserted into the top of the meter for easy one-handed testing. Use both alligator extension to perform "no-hands" tests. Silicone test leads deliver better performance in temperature extremes than test insulated with vinyl.

#### SPECIFICATIONS

### Deluxe Silicone Test Lead

The ADLS2 lead set features high copper strands and are silicone insulated. They offer basket style strain relief and fit inside the test lead holders on all of our meters that have built-in holders. They're rugged and stand up to high and low temperatures better than traditional vinyl test leads and don't become brittle in extreme cold.

#### SPECIFICATIONS

Length: 3 feet

Max temperature: 302°F

Insulation material: Silicone

Probe tip type: Straight removable

Plug type: L-shaped banana (industry standard)
