EC Stroduct of the Year

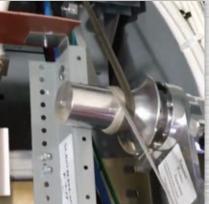

Introducing the

CP 100

The Original Cordless

HANDHELD WIRE TUGGER

Unique Patented Design

THE SAFER, FASTER AND EFFICIENT TOOL FOR PULLING BRANCH CIRCUIT, FEEDER WIRES AND DATA CABLES.

Today, 80% of all project wire being pulled is branch circuit wire. Until now, all of this time consuming work has been done by hand in a slow and tedious fashion.

The new CP1000 takes the work out of pulling wire. With its patented and easy to use design, it puts over 1000 pounds of torque pulling power into the hands of the technician.

Designed for use with most 18V cordless drills, the CP1000 can be carried conveniently throughout the job location without the need for 120 V power.

Flexible and Easy to Use on a Wide Range of Job Site Applications

Because of the design and tool features, many tasks that required two people can now be completed with one, saving time and labor expense.

The CP1000 is flexible. Wire gauges up to 1/0 can be fed using the patented pulley design, depending on the length and difficulty of the pull. And, with the provided attachments it can be used for wire pulls in the following locations:

- Electrical Junction Boxes
- Underground and Overhead Conduits
- Gutters

Plus, you can easily use the CP1000 for pulling multiple branch and data circuits or small feeder wire circuits, including Cat 5, telephone, security and other low voltage applications.

- Subpanels
- Light Poles

Immediate Return on Investment

The CP1000 delivers benefits that translate right to the bottom line. Technicians can complete their pulls 70 - 80% faster than the manual method. Now two man pulls can be conducted by one person, saving you time and money!

With over 30,000 construction workers seeking medical help for on-the-job injuries each year, the CP1000 delivers benefits that impact worker safety and health including:

- Reduction in neck and back pulling strain
- Elimination of repetitive shoulder motion
- Reduction of hand strain and injuries such as carpal tunnel

The CP1000 begins paying you back immediately the day you put it into use.

The

CP 1000

Product Features and Specifications

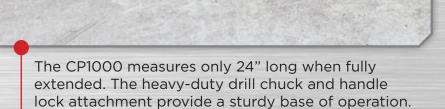

- Solid machined billet aluminum body with adjustable brackets
- Machined, polished and knurled capstan for improved grip
- Solid aluminum mounting brackets and rubber gaskets
- Pivoting extender arm (from 90 270 degrees) to allow pulling at any angle
- Quick release pivot arm to reduce set up time
- Extender arm H bracket for increased stability
- Extender arm roller tip option
- Weighs only 6.2 pounds; 10.5 pounds with a typical cordless drill (lighter than other models)
- Attaches to all major cordless drills
- Complete variable speed power through cordless drill control

The CP1000 comes complete with all attachments, instructions in a job-ready canvas bag.

Attachments easily break down for storage.

ABOUT ELECTRICAL PRODUCT INNOVATION

Electrical Product Innovation Company exists to create new product solutions for electrical contractors, electricians and the general trade.

With a combined 65 years experience in all forms of construction, the team at EPI builds product solutions that improve workplace safety, project efficiency, and improve overall output quality.

EPI proudly produces all their materials in the United States with American made parts and local labor sources.
