KD navien®

We make it easy to go tankless

Navien makes it easy to go **tankless** with the NPN series

Endless hot water when you want it.

With natural gas or LP, Navien high performance premium NPN series tankless water heaters deliver a continuous flow of hot water for as long as you need it. No waiting for a tank to reheat more water, wasting time and energy.

How Navien premium non-condensing tankless water heaters work.

Navien premium tankless water heaters heat water directly without the use of a storage tank. When a hot water faucet is turned on, cold water travels into the unit. The gas burner heats the water and delivers a supply of endless hot water.

Navien NPN tankless water heaters are the future

**Tanks are history.
Navien tankless
is the technology
of tomorrow.**

Navien NaviTech™ stainless steel technology lasts longer than the copper used in other non-condensing tankless water heaters. The NPN also saves water, space and energy, unlike bulky tank water heaters.

**Compact design
saves space.**

The Navien NPN series sleek, wall-mounted tankless water heaters occupy 80% less space than traditional 50 gallon tank water heaters. These compact tankless units can also be installed in cabinets or small closets, indoors or outdoors, unlike bulky tank water heaters.

We make it easy to go tankless

More advantages with Navien tankless

Lower energy bills, easier on the planet.

Unlike systems that waste energy to heat large tanks of water, Navien NPN tankless units utilize approximately 81¢ of every \$1 to heat your water. NPN only starts heating when needed, allowing great utility savings and a lower impact on the environment.

Environmentally friendly low NO_x.

The NPN series non-condensing eco-friendly stainless steel burner emits very low NO_x levels, like our industry leading NPE series condensing tankless water heaters.

Navien NPN series tankless water heaters warranty.

Application		Labor	Parts	Heat Exchanger
Residential	Standard	1 year	5 years	15 years
	Uncontrolled Recirculation	1 year	3 years	5 years
Commercial or Combi*	Standard	1 year	5 years	5 years
	Uncontrolled Recirculation	1 year	3 years	3 years

*Combi refers to a combination potable water and space heating application. Water heaters cannot be used in space heating only applications.
