Founded in 2007, **The Independence Fund** is committed to empowering our nation's catastrophically wounded, injured, or ill Veterans to overcome physical, mental, and emotional wounds incurred in the line of duty. We are dedicated to improving the lives of both our Veterans and their families. Through our Mobility, Caregiver, Adaptive Sports, Advocacy, and Family programs, The Independence Fund strives to bridge the gap of unmet needs for Veterans and their caregivers.

CHOOSING THE RIGHT LIGHT

Classic Wall Lights

No Glare

1,800 – 9,000
LUMENS
20-86 WATTS

The Classic Series wall lights lead the industry in their class, utilizing an innovative, proprietary design to eliminate glare and wasted light. A high-efficiency reflector directs the light forward and downward, resulting in smooth, uniform light exactly where you want it — on the ground, and not in your eyes.

The Classic Series wall lights have a clear prismatic borosilicate glass lens with the placement of the LEDs on the roof of the housing. This eliminates ALL glare and delivers more light to the target.

Independence Wall Lights

Low Glare

2,000 – 10,000
LUMENS
21-82 WATTS

The Independence Series wall lights deliver performance and value. Positioning of the LED modules combined with the unique design of the lens assembly results in light being directed to desired locations and reduces offensive light.

The Independence Series wall lights have a frosted lens with different prismatic optics. The placement of the LEDs is behind the lens – but the lens is what makes this fixture different from the competition.
