

CSST JACKET STRIPPING TOOL

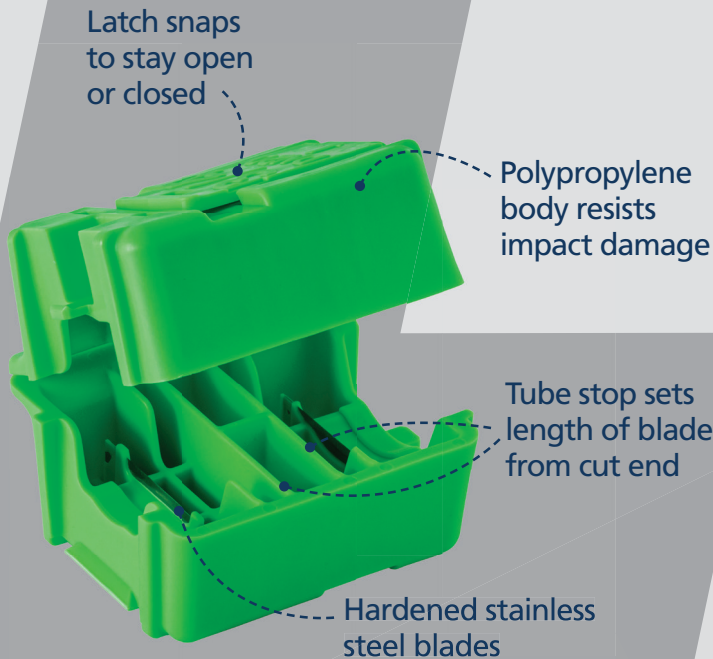

Gastite®

FlashShield+
ENHANCED PROTECTION

MAKE EVERY INSTALLATION EASIER AND SAFER.

With the FlashShield+ Jacket Stripping Tool, you can quickly and correctly remove the protective jacket layers from the gas corrugated stainless steel tube (CSST) before connecting an XR3™ fitting. The Jacket Stripping Tool replaces your utility knife by taking the guesswork out of counting corrugations.

For use with the FlashShield+/Gastite CSST only and cannot be used on any other CSST brand.
