10 Rigid Duct - Periscopes

Zero Periscope™

- Available in 0-5 and 0-18 lengths
- Use where outlets overlap or are very close
- Baffles help direct airflow in 3-5" situations
- Sections are not reversible

18-29" Periscope

- Reaches side of most dryers
- Two piece assembly
- Sections are reversible for airflow the same or opposite

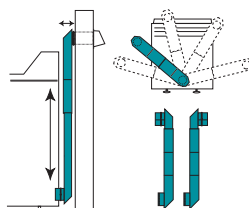

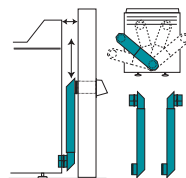

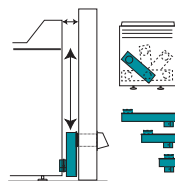

29-50" Periscope

- Reaches top of most dryers
- Four piece assembly
- Sections are reversible for airflow the same or opposite

Extension pieces

- 2" x 6" rigid metal with no fittings
- Slide into and over 18-29, 29-50 and 29-74" sections to lengthen.
- Use aluminum tape to secure the sections

GALVANIZED ELBOW

ALUMINUM ELBOW

LONG SWEEP ELBOW

12 Dryer Vent Kits

Over-The-Top® Snap-Lock™ Dryer Vent Kit

- Installs in 4½", when wall pipe is trimmed flush and wall plate is used. Swivel collars on elbows allow dryer to be pulled away from wall for cleaning without disconnecting. Semi-rigid flexible duct snap-locks together, as final step.

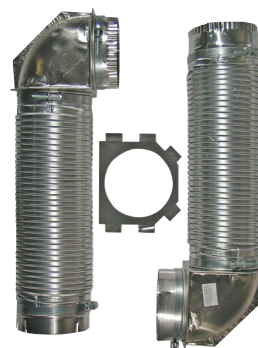

Kit contains:

- Two - 4 ft duct sections attached to two Close Elbows®
- Two - steel screw clamps for wall and dryer connections
- One - wall plate for flush clearance

Dryer Outlet Box

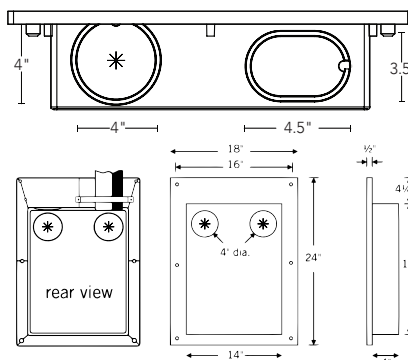

Dryer Outlet Box

This dryer outlet box cleanly finishes off dryer vent rough-ins and recaptures space in the wall behind the dryer for venting.

- One Self trimming unit: 18" wide by 24" high
- Fits all 16" centers 2x4's and 2x6's;
- Six patented rip-tab knockouts in most common positions
 - Four true 4" Dia. knockouts (two rear, two right upper and lower)
 - Two 3" x 4.5" oval knockouts (left upper and lower)

Oval knockouts are provided for non-standard connections to existing venting (i.e. squashed duct), or for a round to oval adapter.

- Four starburst knockouts for gas connections and venting
- Six pre-drilled mounting holes
- Plastic meets UL® standard 94 HB tests for flammability
- Six screws included

Dryer Outlet Box Kit

Kit Includes:

- One Dryer Outlet Box
- One Aluminum Periscope
- Two rectangle to round transitions

SilverDuct™

- UL® 2158A listed and labeled as foil dryer transition duct
- Multi-ply design of metalized polyester and aluminum/polyester laminate with steel wire support
- This product is not recommended by Builder's Best as dryer venting
- Check your clothes dryer manufacturer manual as installation may invalidate warranties
- Check local building codes for appropriate use

Long lengths are constructed to meet UL® 2158A. However, there is no UL® label since clothes dryer transition duct venting is only allowed to be 8 feet in length.

Our Story ... at 30 years

In 1990, Builder's Best had a simple mission:
manufacture [The All Metal Solution to Dryer Venting](#).

Easy to install, but a fire hazard, slinky dryer vents were clogging up dryers nationwide. A new way of hooking up clothes dryer venting was needed. Charles Anderson had an idea for venting that could be installed in close quarters and allowed the dryer to be pulled away from the wall without disconnecting the system. His solution was the Snap-Lock™ Pipe and Close Elbows™, which set industry standards for quality, [American manufactured](#) metal venting that did not take a hours to install. Builder's Best quickly gained recognition for its unique solutions, including more elbows and rigid periscopes, redefining efficiency and safety standards.

Today, Builder's Best is run by Charles's son, John, who has expanded the product line to cover 3" to 20" diameter duct, heavy duty through wall hoods and roof caps in galvanized, aluminum and plastic. We are a manufacturer dedicated to American labor and producing reliable venting solutions. Now with over 200,000 square feet in manufacturing and distribution facilities in three states, Texas, Florida and Nevada, Builder's Best enables professional installers and homeowners to solve residential and commercial venting needs quickly and confidently. Our products are [expertly engineered](#) for specific applications to ensure proper airflow between appliances and the exterior of a home.

We created a dryer venting system, [often imitated but never equaled](#). Our products are found coast to coast in retail stores, wholesalers, distributors, installer groups, contractors and appliance manufacturers under several brand names, including our own. Strategic acquisitions and continual investment in all levels of manufacturing and packaging position us as a leader in the industry. We're proud to celebrate 30 years with you!

Builder's Best is committed to manufacturing in America and distributing quality venting solutions for everyone.

Established in 1990, we make quicker and safer ways of venting appliances. As a result, professional installers have relied on our solutions for nearly 30 years.

We've expanded from dryer venting to bathroom fan vents, kitchen vents and roof caps. Our semi-rigid flexible duct is available in 3" thru 24" diameters. Our periscope line of rigid duct covers 0" to 84" lengths. And our rugged, high capacity roof caps out-perform in ASTM B117 testing.

We design, engineer, tool, manufacture, print and package in-house. We ship truckloads nationwide. Our products are carried by wholesalers, distributors and retailers coast to coast.

Situated in the rolling hills of east Texas we are an hour south of Interstate 20, two hours east of Dallas and four hours north of Houston. Our headquarters is in Jacksonville, Texas. We also maintain distribution and manufacturing plants in Jacksonville, Florida and Las Vegas, Nevada.
