TARANTULA™

SPYDER
2022 PRODUCT CATALOG

PROFESSIONAL TOOLS, WORLD-CLASS INNOVATION

Cutting, drilling, scraping, and sawing are hard work, but they don't have to be. There's a smarter way to tackle these time-consuming, labor-intensive, sweat-inducing jobs. ***Spyder's innovative power tool attachments are engineered to work harder, complete the job faster and last longer – up to 40x faster and 100x longer tool life!*** Using quality materials and innovative designs, our power tool accessories stand up to the punishment that is dished out every day – working as long and hard as the pros who depend on them.

Since our inception in 2008, when the Spyder Scraper® won *New Product of the Year* at the *National Hardware Show*, we continue to win awards for our innovation and quality. From the versatility of a 3-way cut reciprocating saw blade to effortless hole boring to the ingenious design of an arbor system that removes hole saw cores with a push of a button, every tool is meticulously engineered and constructed to provide significant advantages over the standard way of doing things. ***The result is an entire line of high-quality, high-performance tools that save time, effort and money.***

We make the tools that professionals use to power through the toughest jobs without the downtime and frustration of conventional tools. ***Spyder is the go-to source when looking for quality, ease of use, leading-edge performance and value.***

SPYDER® RAPID CORE EJECT™ ARBOR SYSTEM

The Most Efficient Hole Saw System Ever Made!

- Ejects cores with a push of a button, screwdriver not required.
 - Up to 5x faster than the competition.
 - Use with Spyder® TCT, Bi-Metal and Tarantula™ Hole Saws or with any threaded hole saw.
 - Hex8 and Hex10 Arbor Adapters.
 - Hex8 and Hex10 Pilot Bits available with either Tungsten Carbide Tipped (TCT) or High Speed Steel (HSS).
- Hex10 arbor adapter torque pins prevent the saw from becoming wedged onto the arbor, making saw changes quick and easy.

Hex10 HSS Pilot Drill,

CARBIDE TIPPED

TUNGSTEN CARBIDE TIPPED (TCT) RAPID CORE EJECT™ HOLE SAWS

Extreme Material Versatility and Faster Cuts

- Up to 10x more cuts than bi-metal hole saws.
- Up to 5x faster than standard hole saws.
- Tungsten Carbide Tipped for extended life and clean cuts.
- Cuts wood, concrete block, brick, fiber cement board, ceramic wall tile, PVC, and more, with a *Mohs* hardness of less than 6. Some materials including floor tile, porcelains and poured concrete may have a Mohs hardness of 6 or greater. These hole saws are not recommended for harder, abrasive materials. [Consult page 16 for a list of commonly used materials.](#)
- Up to 2-3/8" Depth of Cut.
- Utilizes Rapid Core Eject™ Arbor System – rapidly eject the core, quickly change diameter, cut at an angle, and enlarge existing holes ([see page 6](#)).
- For use in standard rotary drills, **not for use in hammer drill mode.**

Up to 10x More Cuts than Bi-Metal Hole Saws.

UP TO 10x MORE

CARBIDE TIPPED

BI-METAL

BI-METAL RAPID CORE EJECT™ HOLE SAWS

Tough Bi-Metal Steel for Long Life

- Variable tooth pitch guarantees a fast and clean cut through all thicknesses.
- Creates smooth cuts in steel, stainless steel, aluminum, nail-embedded wood, non-ferrous metal, plastics/PVC and more.
Consult page 16 for a list of commonly used materials.
- Up to 1-7/8" Depth of Cut.
- Utilizes Rapid Core Eject™ Arbor System – rapidly eject the core, quickly change diameter, cut at an angle, and enlarge existing holes (*see page 6*).

HOLE SAW KITS FEATURING RAPID CORE EJECT™

Carbide Tipped (TCT), Bi-Metal, and Tarantula Kits

- Speed through tough jobs with Spyder's patented Rapid Core Eject™ Arbor System (see page 6).
- Completes the job 5x faster than your competition and makes your time more valuable.
- Rugged, hard plastic carry case keeps your tools organized.

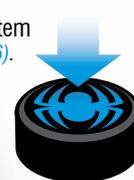

Kits, in a carry case, available in multiple configurations:

- TCT Kits includes 14 or 18 pieces (see page 66)
- Tarantula Kit includes 9 pieces (see page 67)
- Bi-Metal Kits includes 11 or 13 pieces (see page 68)
- Pro Pack includes 14 piece TCT Kit and 13 piece Bi-Metal Kit (see page 67)

Rugged, Hard Plastic Carry Case

Utilizes Spyder® Patented Rapid Core Eject™ Arbor System (see page 6).

DIAMOND EDGE HOLE SAWS

Premium Diamond Abrasive Provides Long Tool Life and Clean Cuts

- Up to 20x more holes than standard diamond hole saws.
- Up to 10x faster than standard glass and tile hole saws.
- Premium boron-coated, industrial diamond abrasive self-sharpenes for quick cuts and long life in tough tile/masonry materials.
- High-temperature, nickel braze adheres at temperatures up to 1.5x the braze of standard diamond hole saws, for increased diamond abrasive retention.
- Segmented cutting edge enhances cut material evacuation and increases cutting performance.
- Oversized and staggered pry holes enable easy core ejection.
- Heavy-duty, single-piece construction and vacuum-furnace heat-treated, high-alloy steel provides a reliable cut and consistent, round holes.
- Black oxide finish reduces cutting friction and prevents corrosion.
- Can be used wet or dry – water spray or immersion will increase tool life, reduce dust and debris, and create a more quiet cut.
- For use on ceramic, porcelain, granite, slate, marble, glass, fiber cement board, laminates and more.
- 1-1/2" depth of cut.
- Made in the USA.

CARBIDE TIPPED PILOT BIT/ARBOR

Auto-Guide Carbide Tipped Pilot Bit/Arbor for Use in 3-Jaw Chuck.

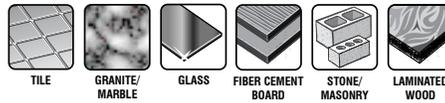

- Carbide pilot drill is spring tensioned to ensure a safer, more consistent cut.
- Retractable pin eliminates the need to pre-drill pilot holes.
- Accurate hole location and center drilling.
- 5/8"-18 Thread, 3/16" carbide pilot drill, 3/8" arbor
- Made in the USA.

DIAMOND EDGE HOLE SAW BITS

Premium Diamond Abrasive Provides Long Tool Life and Clean Cuts

- Up to 20x more holes than standard hole saw bits.
- Up to 10x faster than standard glass and tile bits.
- Premium boron-coated, industrial diamond abrasive self-sharpenes for quick cuts and long life in tough masonry/stone materials.
- High-temperature nickel braze adheres at temperatures up to 1.5x the braze of standard diamond hole saws, for increased diamond abrasive retention.
- Segmented cutting edge enhances cut material evacuation and increases cutting performance.
- Oversized core removal slot enables easy side evacuation of the core, without tools or prying (for materials up to 5/8" in depth).
- 1/4" speed hex won't slip in the chuck.
- Heavy-duty, single-piece construction and vacuum-furnace heat-treated, high-alloy steel provides a reliable cut and consistent, round holes.
- Black oxide finish reduces cutting friction and prevents corrosion.
- Can be used wet or dry – water spray or immersion will increase tool life, reduce dust and debris, and create a more quiet cut.
- For use on ceramic, porcelain, granite, slate, marble, glass, fiber cement board, laminates and more.

STINGER™ SPADE BITS

Won't Clog, Won't Wander and Drills Faster than the Competition

- Up to 20x faster than conventional spade bits.
- Up to 10x more holes than conventional spade bits.
- Automatically engages the work surface for no-thrust drilling.
- Features innovative non-clogging, automatic-feeding precision tip for optimal speed and accuracy.
- Unlike other spade bits with a self-feeding thread point, this patent pending tip won't clog, won't wander, and drills faster than the competition.
- Impact rated for use in battery-powered impacting tools.
- 1/4" speed hex won't slip in the chuck and fits quick-change impact drivers.

STINGER™

STINGER™ MACH-BLUE™ HIGH SPEED STEEL (HSS) DRILL BITS

High Performance Metal and Wood Drilling Bits for Demanding Applications

- Up to 100x more holes than titanium or black oxide drill bits.
- Up to 8x faster than titanium or black oxide drill bits.
- Proprietary Mach-Blue™ is a super hard surface that retains sharper cutting edges, and reduces heat build-up and cutting friction – resulting in faster cuts and exceptionally long drill life.
- Impact rated 1/4" speed hex won't slip in conventional 3-jaw chucks and ideal for use in quick change impacting power tools.
- Optimized 137° self-centering split point cutting geometry won't walk or wander – even on pre-hardened or curved surfaces.
- Advanced M-Series alloy tool steel construction and proprietary heat treatment increase drill bit durability, rigidity and breakage resistance.
- Ideal for drilling wood with nails, stainless steel, mild steel, aluminum, stacked materials and other tough to drill alloys.
- Made in the USA.

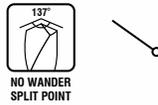

Proprietary Hard Surface Retains Cutting Edges, Reduces Heat and Friction.

Up to 100x More Holes than Titanium or Black Oxide.

STINGER™

STINGER™ MACH-BLUE™ STEP DRILL BITS

Consistently Drill a Wide Range of Holes with a Single Drill Bit

- Up to 50x more holes than titanium or black oxide drill bits.
- Up to 2x faster than titanium or black oxide drill bits.
- Proprietary Mach-Blue™ is a super hard surface that retains sharper cutting edges, and reduces heat build-up and cutting friction – resulting in faster cuts and exceptionally long drill life.
- Impact rated 1/4" speed hex won't slip in conventional 3-jaw chucks and ideal for use in quick change impacting power tools.
- Optimized 135° self-centering split point cutting geometry won't walk or wander – even on pre-hardened or curved surfaces.
- Advanced M-Series alloy tool steel construction and proprietary heat treatment increase drill bit durability, rigidity and breakage resistance.
- Ideal for drilling wood with nails, stainless steel, mild steel, aluminum, stacked materials and other tough to drill alloys.
- Made in the USA.

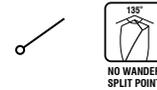

Proprietary Hard Surface
Retains Cutting Edges,
Reduces Heat and Friction.

WARNING: TO REDUCE THE RISK OF SERIOUS INJURY, ALWAYS WEAR PROPER EYE AND RESPIRATORY PROTECTION. CARBIDE IS A HARD BUT BRITTLE MATERIAL. FOREIGN OBJECTS IN THE WORKPIECE SUCH AS WIRE OR NAILS CAN CAUSE TEPS TO CRACK OR BREAK. ONLY OPERATE SAW MACHINE WHEN PROPER SAW BLADE GUARD IS IN PLACE. MOUNT BLADE SECURELY IN PROPER ROTATION BEFORE USING, AND ALWAYS USE A CLEAN, SHARP BLADE.

SAFETY INSTRUCCIONES: Important instructions and warnings are contained in the tool owners manual. Please refer to the manual before using this tool with this blade. Failure to heed all safety instructions and warnings regarding the use of the products could result in serious bodily injury. Visually examine blade for damage. Do not use if damage is suspected.

ADVERTENCIA: PARA REDUCIR EL RIESGO DE LESIONES, LLEVE SIEMPRE LENTES PROTECTORES Y PROTECCION RESPIRATORIA ADECUADOS. EL CARBURO ES UN MATERIAL DURO, PERO QUEBRADIZO. EL INGRESO DE OBJETOS EXTRANOS EN LA PIEZA, TALES COMO ALAMBRE O CLAVOS, PUEDE PROVOCAR QUE LAS PUNTAS SE ROMPAN O SE CUARTEEEN. OPERE LA SIERRA SOLO SI LA GUARDA DE LA HOJA DE SIERRA ESTA EN SU LUGAR. MONTE LA HOJA FIERMENENTE EN LA ROTACION ADECUADA ANTES DE USAR Y SIEMPRE USE UNA HOJA LIMPIA Y AFILADA.

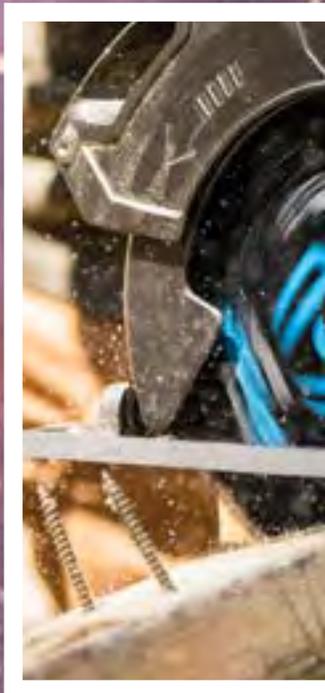

INSTRUCCIONES DE SEGURIDAD: En el manual del propietario del la herramienta encontrara instrucciones y advertencias importantes. Consulte el manual antes de usar la herramienta con esta hoja. No respetar las instrucciones y advertencias respecto del uso de este producto puede ser causa de lesiones corporales graves. Compruebe que la hoja no presente danos. No use la hoja si sospecha que puede estar danada.

DIAMOND EDGE UNIVERSAL CUT-OFF WHEELS

Long Lasting Diamond Abrasive Powers Through Almost any Material

- Lasts up to 100x longer than conventional cut-off wheels.
- Cuts almost any material – steel, stainless steel, cast iron, rebar, masonry, ceramic tile, composites, and more.
- Safer, shatter-resistant steel core won't blow apart like conventional bonded abrasive wheels.
- Lowest cost per cut wheel – spend less time and cost replacing wheels, and more time working.
- Uniform wheel diameter provides a consistent cut.
- Reduced dust and debris during use.
- 4-1/2" and 5" diameter for angle grinders, and 7" diameter for angle grinders and circular saws.
- 7/8" arbor.

CRV / BIM / HSS

CHROME VANADIUM (CrV) JIG SAW BLADES

Chrome Vanadium Blades for Fast and Clean Cuts Through Wood

- **Skeleton™** open framework design creates exceptionally straight cuts and blades dissipate frictional heat for extreme durability.
- **Double-Sided** blades cut forwards, cut backwards and pivot like a scroll saw to make tight curve cuts.
- Blade types include: Fast Straight, Clean Straight, Clean Straight Down, Fast Curve, and Clean Curve.
- Blade lengths include: 3, 4 and 4-1/2 inches.
- Made in Germany.

Skeleton™ Open Framework Design Creates Exceptionally Straight Cuts.

Double-Sided Blades Create Precise, Small Curve Cuts.

Down Cut Creates Cleaner Top Cuts.

CHROME VANADIUM

For Fast and Clean Cuts Through Soft and Hard Wood.

Curve Wood Cutting:

- 4-1/2", 8/10 TPI, Fast, Curve, **Double-Sided**, Soft Wood
- 4", 17/19 TPI, Clean, Curve, **Double-Sided**, Hard Wood
- 3", 3 TPI, Clean, Curve, Soft Wood
- 4", 19 TPI, Clean, Curve, Hard Wood
- 4", 6TPI, Fast, Curve, Soft Wood

Straight Wood Cutting:

- 4", 10 TPI, Fast, Straight, **Skeleton™**, Soft Wood
- 4", 17 TPI, Clean, Straight, **Skeleton™**, Hard Wood
- 4", 6 TPI, Fast, Straight, Soft Wood
- 4", 10 TPI, Clean, Straight, Soft Wood
- 4", 10 TPI, Clean, Straight, Down, Soft Wood

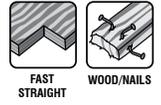

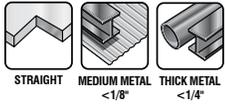

Available in Kits and Sets

BI-METAL (BiM) JIG SAW BLADES

8% Cobalt Bi-Metal Steel Blades for Tough Cuts

- Highly heat resistant.
- Cuts hard wood, plywood, laminated wood, all plastics, steel, stainless steel, aluminum, and wood with nails.
- Blade types include: Fast Straight, Clean Straight, Double Clean Straight, and Clean Curve.
- Blade lengths include: 4 and 5-1/8 inches.
- Made in Germany.

Cuts All Plastics.

DOUBLE CLEAN
TOP & BOTTOM

Double Clean Creates Clean Top & Bottom Cuts.

Cuts Medium Metal and Stacked Materials.

BiM Blades are Highly Heat Resistant.

BI-METAL 8% Cobalt Blades Better for Cutting Hard Wood, Thin & Thick Metal.

Metal Cutting:

- 4", 21 TPI, Medium Metal <1/8"
- 4", 12 TPI, Thick Metal <1/4"

Laminated Wood Cutting:

- 4", 16 TPI, Clean, Curve
- 4", 17 TPI, Clean, Straight (All Plastics)
- 5-1/8", 12 TPI, Double Clean, Straight

Wood & Metal Cutting:

- 5-1/8", 6-10 TPI, Fast, Straight

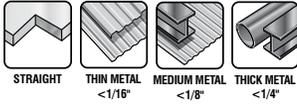

Available in Kits and Sets

See page 77 and page 78 for specifications and ordering information.

HIGH SPEED STEEL (HSS) JIG SAW BLADES

High Speed Steel for Cutting Metal

- High Speed Steel, good for cutting wood with nails.
- Blade lengths include: 3 and 3-5/8 inches.
- Made in Germany.

HIGH SPEED STEEL

High Speed Steel for Cutting Metal

Metal Cutting:

- 3", 28 TPI, HSS, Thin Metal <1/16"
- 3-5/8", 18-23 TPI, HSS, Medium Metal <1/8"
- 3-5/8", 11-13 TPI, HSS, Thick Metal <1/4"

Available in Kits

See page 78 for specifications and ordering information.

3X3TM
STRENGTH • VERSATILITY • DURABILITY

3X3™ DOUBLE-SIDED RECIPROCATING SAW BLADES

Blades Cut in Any Direction

- Double-edged blade cuts in both directions without needing to flip the saw over.
- Rounded tip plunge cuts with ease – no pilot hole needed.
- Two-sided blades last up to 20x longer than conventional single sided blades.
- Shatter resistant 8% cobalt Bi-Metal blade.
- Cuts wood, pipe, sheet metal, plastic, fiberglass, and more.
- Cost effective – 2 blades for the price of one!
- Made in Germany.

Plunge Cut with Ease.

Shatter Resistant 8% Cobalt Bi-Metal Blade.

Two-Sided Blades Last up to 20x Longer than Conventional One Sided Blades.

UP TO **2x10x** LONGER 

Length, TPI and Applications:

- 6" - 10/6 TPI - Wood, Drywall and Laminates
- 6" - 14/10-14 TPI - Demolition and Metal
- 6" - 18/14 TPI - Metal, Nail-Embedded Wood and Fiberglass
- 8" - 10/6 TPI - Wood, Drywall and Laminated Wood
- 8" - 10/8-12 TPI - Advanced Demolition
- 8" - 14/10 TPI - Demolition and Metal
- 8" - 14/10-14 TPI - Extreme Metal, Nail-Embedded Wood and Fiberglass
- 10" - 10/8-12 TPI - Advanced Demolition
- 10" - 14/10-14 TPI - Extreme Metal, Nail-Embedded Wood and Fiberglass

CARBIDE TIPPED

TUNGSTEN CARBIDE TIPPED (TCT) RECIPROCATING SAW BLADES

Cuts with Significantly Less Dust & Debris than Conventional Rotary Cutting Wheels

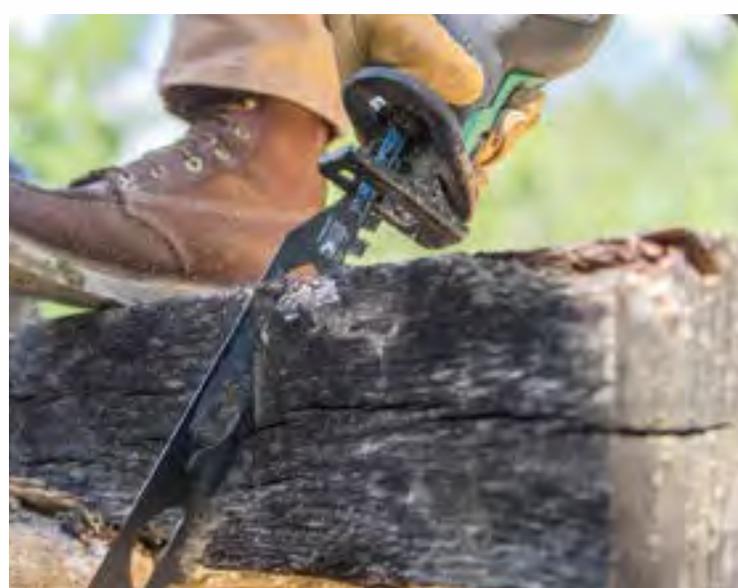

- Quickly cuts through concrete block, brick, masonry and timber.
- Creates less dust & debris than conventional rotary wheels.
- Tungsten carbide tipped blade provides extended tool life.
- Make square & flush cuts.
- Access hard-to-reach areas.
- 9", 12" and 18" lengths.
- Made in Germany.

Lengths:
9", 12" and 18"

CARBIDE TIPPED
Tungsten Carbide Tipped Blade
for Extended Tool Life.

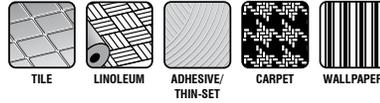

SPYDER® SCRAPER™ RECIPROCATING BLADES

Finish the Job in a Fraction of the Time with a Fraction of the Effort

- Easily remove tile, linoleum flooring, mastics and more.
- Quenched and tempered high-carbon spring steel retains edge sharpness.
- Re-sharpenable blade extends tool life.
- Multiple applications.
- Fits all reciprocating saws.
- Made in the USA.

Fits all
Reciprocating Saws.

Widths:
2", 4" and 6"

Re-sharpenable
High-Carbon Spring
Steel Blade.

Widths and Applications:

- 2" - Ceramic & Vinyl Tile Adhesive, Thin-Set, Linoleum, Tough Glue and Drywall Mud
- 4" - Linoleum, Tough Glue and Drywall Mud
- 6" - Paint, Rubber-Backed Carpet and Wall Paper

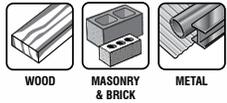

Also Available in Bulk or as a Set

CARBON STEEL WIRE RECIPROCATING BRUSH

Fits Where Many Rotary Brushes Cannot

- Use on metals, concrete, stone and wood surfaces.
- Tough carbon steel bristles remove the toughest contaminants.
- Removes flaking paint, rust, scratches, dirt and small imperfections.
- Fits all reciprocating saws.

Available in Bulk

NYLON RECIPROCATING BRUSH

Makes Clean-Up and Surface Prep a Snap

- Use on grout, carpet, tile, laminates, rubber, concrete, brick and more.
- Nylon bristles provide tough cleaning power without scratching surfaces.
- Makes quick work of stubborn layers of grime.
- Fits all reciprocating saws.

GROUT-OUT™ RECIPROCATING BLADES

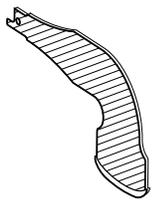

Provides Both Speed and Precision to Make Your Job Easy

- Up to 10x faster than hand removal.
- Vacuum-braided tungsten carbide grit quickly removes grout.
- Power through any grout in a fraction of the time – including urethane and epoxy.
- Fits all reciprocating saws.

UP TO
10x
FASTER

Up to 10x Faster than
Removal by Hand.

2 Widths

Narrow 1/16"

For joints 1/16" - 3/16"

Wide 3/16"

For joints 3/16" - 3/4"

Available in Bulk or as a Set

Fits all
Reciprocating Saws.

Tungsten
Carbide Grit

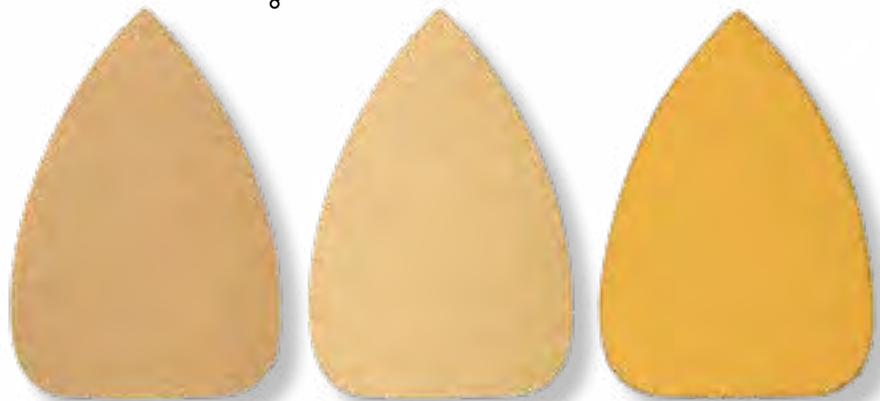

SANDER

Tight Spaces, Curved Surfaces and Hard-to-Reach Corners

- Quickly sand tight spaces, curved surfaces and outside and inside corners.
- Tough insert-molded attachment blade provides maximum durability.
- Hook-and-loop sandpaper is quick and easy to replace.
- 3 piece sandpaper set included.
- Compatible with Mouse™ sandpaper.
- Fits all reciprocating saws.

3 Piece, Quick and Easy to Replace,
Hook-and-Loop Sandpaper Included.
(80, 120 and 220 Grit)

SHOP STOOL

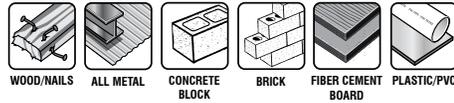

Retro Vinyl Padded Stool

- Constructed with heavy-duty steel & high grade vinyl for durability.
- Industrial quality stool supports up to 300 lbs.
- Chrome-plated legs are equipped with anti-slip protective caps.
- Perfect for any shop, garage or home.
