CARE INSTRUCTIONS

BEFORE YOU TURN ON YOUR FAUCET

During construction of your new home, it is possible that debris (dirt, sand, stones, etc) may have fallen into the water lines. Pfister suggests, as a precautionary measure, that you conduct the following cleaning procedure on your kitchen and lavatory faucets.

1. Carefully unscrew the aerator from the spout of the faucet
2. After turning on the cold and hot water supply lines, turn the faucet handle to the fully open cold position. Run the water for several minutes until any debris has cleared the valve, and then turn the faucet handle to the closed position. Repeat step for hot water.
3. Rinse the aerator's cone-shaped screen to eliminate any debris in it.
4. Securely screw the aerator back into the spout, and check for any leaks.
5. If any troubles occur or if installation help is needed, please contact Pfister Consumer Service at www.pfisterfaucets.com or 1-800-Pfaucet (800-732-8238).

FINISH CARE

It's easy to keep your faucets looking new and your warranty intact:

- DO wipe water from faucets after each use to avoid spotting and build-up.
- Do use only a soft damp cloth, warm water and/or typical non-abrasive dish washing soap (i.e. Palmolive, Dawn) to wipe clean.
- DO NOT use abrasive cleansers or abrasive cloths on your faucets.
- DO NOT allow water to dry on faucets as it may cause unsightly spotting.

Congratulations on your new home complete with Pfister faucets.
