

Product Specifications

Gear Punch Tool Kit (19pcs set, includes case and gear punch)

Part number GPTK2
Category number 6410
UPC 781002857655

The Gear Punch is the first gear driven knockout tool to feature a 7/16 quick change hex that allow users to cut down on installation time and increase jobsite efficiency. Lightweight and durable, the Gear Punch Tool is capable of cutting through 10 gauge mild steel and 10 gauge stainless steel. This compact, durable kit includes 1/2" through 4-1/2" cups and dies and the Punch Tool Layout Guide for precise centering and measuring. An easy grip, ergonomic handle provides the user a strong base while the drill draws the cup and die together for a clean cut hole.

Physical Characteristics

Type	Gear Punch Tool Kit
Material	S45C Steel & Aluminum Alloy
Handle Material	Aluminum Alloy

Packaging Details

Standard Qty	1
Price Per	1
Package Length	14.8
Package Width	20.3
Package Height	5.9
Package Weight	38.9
Net Weight	38.9

Performance Data

Intended Cutting Material	Steel & Stainless Steel
Applications	Hole-Making in Steel & Stainless Steel
