

2018 PRODUCT CATALOG

KEEP UP. WITH BRIDGEPORT.

ON EVERY JOB.

SOLAR PRODUCTS

SOLAR POWER INVERTER

SGB SERIES MIGHTY-RITE® SPLIT GROUNDING BUSHINGS INSTALL BEFORE OR AFTER WIRE IS PULLED AND TERMINATIONS ARE MADE.

ROOFTOP TRANSITION BOX

160-G SERIES GROUNDING LOCKNUTS FASTEN AND GROUND BRIDGEPORT CONNECTORS, THREADED HUBS AND NIPPLES.

190 SERIES LOCK-A-LINER BUSHINGS INSULATE CONNECTORS, NIPPLES AND BUSHINGS WITH CONDUCTORS TERMINATED.

RIGID RACEWAY SEAL

140 SERIES SEALING LOCKNUTS PROVIDE RAIN-TIGHT SEAL WHEN FASTENING THREADED RIGID TO ENCLOSURE.

MAKE THE BEST CONNECTIONS UNDER THE SUN.

THICK WALLED PV COMBINER BOX

250-RT2XL SERIES EXTRA LONG MIGHTY-SEAL® RAIN-TIGHT CONNECTORS EXTRA LONG THREADS MAKE FOR EASY CONNECTIONS TO THICKER ENCLOSURES.

290-RT SERIES MIGHTY-MERGE® RAIN-TIGHT TRANSITION COUPLINGS PROPERLY CONNECT TO HUBS OR TRANSITION EMT TO RIGID IN WET LOCATIONS.

PV EMT RACEWAY

40CG SERIES LBs THREADED CONDUIT BODIES FOR RACEWAY DIRECTION CHANGE.

WET LOCATION ENCLOSURE SEAL

250-RT2 SERIES RAIN-TIGHT EMT CONNECTORS INTERNAL SEAL RING AND KNOCKOUT GASKET PROVIDES LISTED WET LOCATION SEAL.

GENERAL NOTES

General Notes and Product Standards

- For product dimensions, consult our on-line catalog at www.bptfittings.com.
- Due to ongoing product improvements, specifications and dimensions are subject to change without prior notice.
- Underwriters Laboratories, Canadian Standards Association, Intertek and Federal Specifications are current at time of publication but are subject to change without prior notice. Current , , and  listings are noted on the smallest unit carton label. Look for the appropriate logo.
- This manual is intended for use as a guide in selection of electrical fittings manufactured by Bridgeport Fittings, Inc. Do not use this manual as an interpretation of the National Electrical Code or local regulations. Always consult your local electrical inspector for requirements in your area.

Products listed or certified comply with the following certifications and specifications:

Product Group	UL Standard	NEMA Standard	Federal Specification	CSA Standard

BRIDGEPORT'S

PRODUCT CATALOG

Powered By The Sun. Connected By Bridgeport.

At Bridgeport Fittings,
we understand

the importance of renewable energy. That's why we are dedicated to providing you with the products that help you be more productive and profitable on every solar installation. Follow the lead of some of the country's biggest and best solar contractors and ask for Bridgeport.

Throughout this catalog you'll find time and money saving products that can be used on your next installation. Simply look for the sun!

Liquid Tight Fittings

	Description	Catalog No. or Series
	Nonmetallic Liquid Tight Connectors	429-NMLT to 435-NMLT
	Straight Zinc Liquid Tight Connectors	429-LT2 to 439-LT2 and 429-LTI2 to 439-LTI2
	Straight Steel and Malleable Iron Liquid Tight Connectors	Steel: 429-SLT to 432-SLT and 429-SLTI to 432-SLTI Malleable: 433-SLT to 439-SLT and 433-SLTI to 439-SLTI
	Liquid Tight Sealing Rings	SR-050 to SR-400
	Zinc Die Cast Transition Couplings	4360-DC to 4365-DC
	Malleable Iron Transition Couplings	4369-LT to 4375-LT

Wet Location Fittings

	Description	Catalog No. or Series
	Zinc Die Cast Threaded Hubs	151-DC to 160-DC
	Zinc Die Cast Grounding Hubs	166-DCG to 170-DCG
	US Made Zinc EMT Raintight Compression Connectors	250-RT2 to 259-RT2 and 250-RTI2 to 259-RTI2
	US Made Zinc EMT Raintight Compression Couplings	260-RT to 269-RT
	Mighty-Seal® Push-EMT® Raintight Connectors	250-MSRT, 251-MSRT and 250-MSRTI, 251-MSRTI
	Mighty-Seal® Push-EMT® Raintight Couplings	260-MSRT 261-MSRT
	US Made Steel Raintight Compression Connectors	250-SRT to 259-SRT and 250-SRTI to 259-SRTI
	US Made Steel Raintight Compression Couplings	260-SRT to 269-SRT
	US Made Zinc Die Cast UF Cable Connectors	761-UF and 762-UF
	Straight PVC Jacketed MC Cable Connectors	595-DC2, 596-DC2 and 595-DCI2, 596-DCI2 (Cor-Shield Polyolefin coated versions 595-DC2C and 596-DC2C)
	90° PVC Jacketed MC Cable Connector	895-DC2 and 895-DCI2 (Cor-Shield Polyolefin coated version 895-DC2C)
	Mighty-Seal® Reducing Sealing Washers	1061-RT to 1074-RT
	Mighty-Align® Self-Aligning Raintight Three-Piece Conduit Couplings	1121-RT to 1130-RT
	Mighty-Seal® Raintight Offset Nipples	1520-RT to 1522-RT

Grounding and Bonding Products

	Description	Catalog No. or Series
	Mighty-Rite® Split Grounding Bushings	SGB Series
	Solderless Lugs	ALI-50 to ALI-252
	Solar Panel Grounding Connector	ALI-SLR
	Mighty-Bond® Enclosure Grounding Connectors	MC-050, MC-075 and MC-100
	Mighty-Bond® Enclosure Grounding Couplings	MCC-050, MCC-075 and MCC-100
	Mighty-Bond® Raintight Grounding and Bonding Hubs	MCH-075 and MCH-100 in brass (MCH-125 to MCH-200 in stainless steel)
	Mighty-Bond® Grounding & Bonding Bridge	IGB-050 and IGB-075
	Mighty-Bond® Ground Rod or Rebar Bridge Clamp	IGBC-063 and IGBC-075

Conduit Bodies

	Description	Catalog No. or Series
	Threaded Rigid Conduit Bodies Type C	C-41CG to C-50CG
	Threaded Rigid Conduit Bodies Type LB	LB-41CG to LB-50CG
	Threaded Rigid Conduit Bodies Type LL	LL-41CG to LL-50CG
	Threaded Rigid Conduit Bodies Type LR	LR-41CG to LR-50CG
	Threaded Rigid Conduit Bodies Type LL/LR	LLR-41 to LLR-46
	Threaded Rigid Conduit Bodies Type T	T-41CG to T-50CG

Straps and Clamps

	Description	Catalog No. or Series
	Mighty-Hold™ Universal Clamp Straps	Steel: UCS-5075 to UCS-150200 Stainless Steel: UCSS-5075 to UCSS150200 Cor-Shield Polyolefin coated Steel: UCSC-5075 to UCSC150200
	US Made Steel EMT One Hole Straps	920-S to 925-S and 907-S to 910-S
	Malleable Iron EMT One Hole Straps	920 to 925 and 907 to 910
	US Made Steel Rigid One Hole Pipe Straps	901-S to 910-S
	Malleable Rigid One Hole Pipe Straps	900 to 913
	Aluminum Rigid One Hole Pipe Straps	901-AL to 906-AL
	Malleable Iron Clamp Backs	941 to 950
	Conduit Clamps	961 to 966
	Beam Clamps	951-S and 953-S

Mighty-Rite® Split Grounding Bushings

Install your bushings on conduit or fittings before or after pulling wire and making connections. Mighty-Rite's innovative hinged design adjusts and aligns easier – even in tight spots. Our adjustable lay-in lugs accept and position conductors for simple access. Mighty-Rite's unique split design and ease-of-use allows shorter facility downtime when upgrading existing power and data systems.

All Zinc Die Cast Mighty-Rites are now available with Stainless steel hardware and UV stabilized insulators, for use in outdoor applications.

150°C Captive Nylon Insulator. Patented.
US Patent 8,419,449; 7,182,611; 6,840,782.

 File No. E20412

Solar Panel Grounding Connector

Designed to prevent galvanic reactions and enhance conductivity. The connector body has extruded serrations for breaking the anodized finish on photovoltaic modules and frames. The serrations in the wire binding break corrosion on the grounding wire which means that no surface preparation is required for the PV module, the frame or the ground wire. The unique clamp-on design means no mounting holes are required. The connector simply clamps onto the frame of the solar panel. The unit is UL 467 Listed and accommodates aluminum or copper conductor. The connectors feature stainless steel hardware.

Tin Plated Aluminum with Stainless Steel Hardware

Catalog Number	Wire Capacity	Unit Qty.	Std. Pkg.
ALI-SLR	4 to 14	25	250

**Mighty-Hold™
Universal
Clamp Straps**

One piece clamp back and strap secures both cable and conduit. Secures EMT, Rigid, IMC, Metallic Liquid Tight, Nonmetallic Liquid Tight, FMC, and Schedule 40 and Schedule 80 PVC conduit, as well as steel and aluminum AC/MC cable. Patented. US Patent 9,243,723.

**Extra Long Raintight
Compression Connectors**

Compression style connector with internal sealing ring and knockout gasket to create a raintight seal when connecting EMT to box or enclosure. Extra long threads for connecting to thicker enclosures and solar combiner boxes. NEMA TYPE 2,3,3R & 4. NPSM Threads. These have rubber gaskets with steel retaining rings. Patented. US Patent D787,648; 7,976,070; 7,604,261; 7,390,027.

Might-Rite® Split Grounding Bushings

Install your bushings on conduit or fittings before or after pulling wire and making connections. Might-Rite's innovative hinged design adjusts and aligns easier – even in tight spots. Our adjustable lay-in lugs accept and position conductors for simple access. Might-Rite's unique split design and ease-of-use allows shorter facility downtime when upgrading existing power and data systems.

All Zinc Die Cast Might-Rites are now available with Stainless steel hardware and UV stabilized insulators, for use in outdoor applications.

150°C Captive Nylon Insulator. Patented. US Patent 8,419,449; 7,182,611; 6,840,782.

Bridgeport's raintight offset nipples are used to offset the axis of a raceway 3/4" between enclosure runs. Rugged zinc die cast construction ensures mechanical protection and durability. Integrated sealing washers maintain wet location/raintight seal. Completely assembled with locknuts and polyethylene sealing washers. NPSM threads. NEMA TYPE 2,3,3R & 4. Patented. US Patent D690,657.

Mighty-Move® Steel Expansion Couplings for Rigid

Assembles like a regular Rigid/IMC set screw coupling. To install, simply slide coupling end stop onto fixed end of conduit and tighten set screw. Place movable conduit end completely into coupling and mark engagement, remove conduit and mark half the distance of engagement, reinstall conduit to half the distance. Bonding jumper purchased separately. US Patent 6,715,803.

ICE-100	1"	2	10

Bridgeport's Patented ICE Series Inside Corner Elbow is used to connect two lengths of 1/2" EMT to form a 90° change of direction. The Inside corner cover allows for installation in locations where the side or back of the elbow is inaccessible. The cover easily removes using a screwdriver to pop it off, and then it presses back into place by hand. Cover should only be removed to guide conductors through the 90 degree bend, and then it should be replaced. Cover must be in place when pulling conductors through the connector, as the cover provides a smooth pulling surface for the conductors to glide against. Patented. US Patent 9,341,292; D737,783.

Green Set Screw Connectors

Set screw connector used to join EMT to box or enclosure. Color coded green to match EMT for easy identification. Use with green EMT for grounding/bonding, hospital and healthcare, such as nurse call station applications. Concrete-tight. Furnished with Tri-Drive slot/Phillips/Robertson head screws. Also listed for use with Aluminum EMT. Patented. US Patent 6,861,585.

 US File No. E24001

4157-DC

4357-DC

4457-DC

Coupling used to join duplex AC/MC cable or flexible metal conduit to EMT. Set screw type transitional fitting ideal for commercial and institutional facilities. A labor savings, compared to the traditional junction box installation. Simply remove the armor and expose the length of conductors to reach the device box or enclosure. Insert FMC or AC/MC until visible in inspection holes. Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables. Patented.

4156-DC through 4457-DC:US Patent D581,877; D699,195; D755,728; D750,570; 9,252,577; 7,402,752. 4357-NM: US Patent D795,814; D792,855; D775,590; 9,608,417.

Mighty-Move® Steel Expansion Couplings for EMT

Low cost and easy to use. Assembles like a regular EMT set screw coupling. Use to compensate plus or minus 2" lateral movement of conduit in dry locations. Available for use with trade size 3/4" thru 4" steel EMT. To install simply slide coupling end stop onto fixed end of EMT and tighten set screw. Place movable EMT completely into coupling and mark engagement, remove EMT and mark half the distance of engagement, reinstall EMT to half distance. May be used with **optional Bonding Jumper Assembly cat. nos. BJ-100, BJ-200 and BJ-400.**
US Patent 6,715,803.

Mighty-B™ PUSH-EMT® Fittings

Connecting EMT conduit in wet or dry locations has never been this fast and simple. Mighty-Seal® and Mighty-Bite™ connectors and couplings are part of the exclusive Mighty-B™ line of high-quality, high-performance products focused on getting the job done fast, done right. Legendary Bridgeport quality, innovation and unparalleled service are built in to every fitting we ship. All fittings exceed the stringent design requirements of UL 514B and the National Electrical Code.

Raintight versions are NEMA TYPE 2,3,3R & 4, with NPSM Threads and Neoprene Gaskets. Patented. US Patent 8,487,197; 8,274,000; 6,765,143; 8,474,877; 7,841,630.

- Push-on install
- Removable
- Raintight & dry location models
- Constructed of the highest quality zinc
- Corrosion resistant
- Precision cast threads
- Reversible zinc serrated locknut
- cULus Listed
- Approximately 75% quicker to install than conventional fittings
- Patented

Typical Raintight Installation and Removal

Installation

1. No disassembly required
2. Cut EMT square and remove burrs
3. Firmly push and rotate EMT onto fitting a minimum 1/2"
4. For connector, install with knockout gasket on outside of enclosure. Hand tighten locknut plus 1/4 turn

Removal

1. Unscrew nut from fitting body
2. Remove EMT
3. To reuse*, ensure components are assembled in order (see below) and tighten nut hand tight

*Fittings have not been investigated for reusability. Reusability should be determined by the installer and the AHJ.

Typical Dry Location Installation and Removal

Installation

1. Cut EMT square and remove burrs
2. Firmly push and rotate EMT onto fitting a minimum 1/2"
3. For connector, install into knockout with locknut. Hand-tighten plus 1/4 turn

Removal

1. Turn counter-clockwise to remove from EMT
2. Fitting is ready to be reused.*

* Fittings have not been investigated for reusability.
Reusability should be determined by the installer and the AHJ.

REDUCED INSTALLATION TIME:

**Mighty-Merge®
Snap-in/Push-in
Transition Couplings**

The patented Mighty-Merge design has a quick install snap-in end for AC/MC cables and flexible metal conduit and a labor saving push-in end for EMT. Ideal for transitioning fixture whips above the drop ceiling and for continuing the speed of MC down the wall to emergency lights. Patented. US Patent 8,487,197; 8,274,000; 6,765,143.

431-LT2C	3/4"	10	50
432-LT2C	1"	5	25
435-LT2C	2"	2	20

Bridgeport Fittings' New LT2C Coated Liquid-tight Connectors offer superior protection for your coated raceway. These are the only listed fittings suitable for Direct Burial in earth and concrete, as well as for above-ground use. The Cor-Shield Polyolefin coating provides a durable shield when installed in corrosive environments. They provide a liquid (concrete, water, and oil) tight seal, and are listed for use with both metallic and non-metallic "Type B" liquid tight flexible conduit. NPT Threads. Polyethylene gasket. NEMA TYPE 2,3,3R,4 &12.

Cor-Shield Polyolefin is an alternative material to Polyvinyl Chloride (PVC). It provides superior chemical, corrosion, and UV protection to your typical PVC coating, and it is environmentally friendly. The strong, flexible properties resists cracking, abra-sion and impact damage. Unlike PVC, nicks or cuts in the Cor-Shield Polyolefin coating can be repaired by heating the surface until the coating flows, without the possibility of ignition.

Suitable for use in Class I, Div 2; Class II, Div 1 and 2; and Class III, Div 1 and 2 hazardous locations.

 File No. E9391

Liquid Tight Connectors, Straight

Steel

Malleable

Straight connector for use with metallic liquid tight conduit. NPT Threads. Polypropylene or Polyethylene gasket. NEMA TYPE 2,3,3R,4 &12.

Used when a concentric knockout breaks out larger than expected. Maintains NEMA 2,3,3R & 4 rating on listed enclosures. Includes one coated and one uncoated washer. Coated washer installs on the exterior of the box. Sunlight resistant. Patented. US Patent 9,709,171.

File No. E11259

Sealing Locknuts

Used to provide raintight seal when fastening threaded conduit to unthreaded opening in a box or enclosure. NPSL Thread. PVC gasket. NEMA TYPE 2,3,3R, 4.

File No. E9391

Mighty-Seal® PVC Jacketed MC and TECK Cable Connectors

CONCRETE-TIGHT RAINLIGHT

For connecting PVC jacketed MC cable (parking deck/lot cable) or TECK cable to box or enclosure. Simply strip 7/8" to 1" of jacket from end of cable, loosen nut, and push cable into connector until cable reaches end stop. Tighten nut for raintight connection. Knockout gasket provides positive seal at 1/2" K.O. NPT tapered threads permits installation in threaded boxes. The 595-DC2C, 596-DC2C and 895-DC2C have a Cor-Shield Polyolefin coating and are listed for direct burial. Concrete-tight. NPT Thread. Polyethylene gasket. NEMA TYPE 2,3,3R, 4. DC2C versions are also NEMA TYPE 4X. Patented. US Patent D604,242; 6,737,584.

 File No. E20534 (except 595-DC2C, 596-DC2C and 895-DC2C)

Mighty-Rite® Split Grounding Bushings

Install your bushings on conduit or fittings before or after pulling wire and making connections. Mighty-Rite's innovative hinged design adjusts and aligns easier – even in tight spots. Our adjustable lay-in lugs accept and position conductors for simple access. Mighty-Rite's unique split design and ease-of-use allows shorter facility downtime when upgrading existing power and data systems.

All Zinc Die Cast Mighty-Rites are now available with Stainless steel hardware and UV stabilized insulators, for use in outdoor applications.

150°C Captive Nylon Insulator. Patented.
US Patent 8,419,449; 7,182,611; 6,840,782.

Whipper-Snap® Duplex Connectors

3838SP

3838ASP

The 3838ASP and 3838SP are double-snap type connectors. Simply snap cables into connector and snap assembly into electrical box. No tools required! Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables. Integral internal spring steel locking tabs fasten cable or conduit. External spring steel locking tabs secures connector to electrical box. Suitable for maintaining grounding continuity when installed in accordance with the NEC. Patented Whipper-Snap design. US Patent 7,075,007; 7,154,042; 7,151,223; 6,916,988; 6,872,886.

**Mighty-Seal®
PVC Jacketed
MC and TECK
Cable Connectors**

CONCRETE-TIGHT RAIN-TIGHT

For connecting jacketed MC cable (parking deck/lot cable) or TECK Cable to box or enclosure. Simply strip 7/8" to 1" of jacket from end of cable, loosen nut, and push cable into connector until cable reaches end stop. Tighten nut for raintight connection. Knockout gasket provides positive seal at 1/2" K.O. NPT tapered threads permits installation in threaded boxes. The 595-DC2C, 596-DC2C and 895-DC2C have a Cor-Shield Polyolefin coating and are listed for direct burial. Concrete-tight. Patented. NPT Thread. Polyethylene gasket. NEMA TYPE 2,3,3R, 4. DC2C versions are also NEMA TYPE 4X. Patented. US Patent D604,242; 6,737,584.

Set Screw Connectors

507-DC2

USL-120

The 507 and 508 series are straight set screw type fittings used to connect flexible metal (steel) conduit to box or enclosure. The USL-120 is for use with extra flexible steel conduit and is UL recognized for use with listed or certified subassemblies.

 File No. E9391 (507 and 508 series)

 File No. LR39354 (507 and 508 series)

Whipper-Snap® Snap-In Two Screw-Type Connector

Used to connect flexible metal conduit to box or enclosure. Also see AC/MC section for additional listings. Patented Whipper-Snap design. US Patent 7,154,042; 7,151,223; 6,916,988; 6,872,886.

Mighty-Seal® PVC Jacketed MC and TECK Cable Connectors

CONCRETE-TIGHT RAIN TIGHT

For connecting PVC jacketed MC cable (parking deck/lot cable) or TECK cable to box or enclosure. Simply strip 7/8" to 1" of jacket from end of cable, loosen nut, and push cable into connector until cable reaches end stop. Tighten nut for raintight connection. Knockout gasket provides positive seal at 1/2" K.O. NPT tapered threads permits installation in threaded boxes. The 595-DC2C, 596-DC2C and 895-DC2C have a Cor-Shield Polyolefin coating and are listed for direct burial. Concrete-tight. NPT Thread. Polyethylene gasket. NEMA TYPE 2,3,3R, 4. DC2C versions are also NEMA TYPE 4X. Patented. US Patent D604,242; 6,737,584.

Duplex Connectors

601-DC2, 621-DC2

691-DC2

For connecting AC/MC cable and flexible metal cable to box or enclosure. The 601-DC2 is CSA Listed for ACG90. Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables.

UL File No. E20534

Whipper-Snap® Duplex Connectors

3838SP

3838ASP

The 3838ASP and 3838SP are double-snap type connectors. Simply snap cables into connector and snap assembly into electrical box. No tools required! Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables. Integral internal spring steel locking tabs fasten cable or conduit. External spring steel locking tabs secures connector to electrical box. Suitable for maintaining grounding continuity when installed in accordance with the NEC. Patented Whipper-Snap design. US Patent 7,075,007; 7,154,042; 7,151,223; 6,916,988; 6,872,886.

MC-FLEXFIT™ Adjustable MC Connector

Bridgeport's new 680-UI series of adjustable endstop connectors have an innovative one piece armor stop and insulated throat that provides greater conductor protection. These items have a two position/two screw hinge design which allows for a large cable range without needing separate bushings. The heavy duty steel construction supports large sized MC Feeder Cable.

Patented. US Patent D787,043; 9,373,919.

280SP

280SPMB

Set screw type couplings used to join EMT to AC/MC and flexible metal conduit. See below. The patented 280-DCX and 280-DC have steel straps.

The 280SP, 280SPMB and 281SPMB are patented Mighty-Merge® Designs. The 280SP has a set screw end for EMT and a Snap-In end for AC/MC cables and flexible metal conduit. The 280SPMB and 281SPMB have Push-In ends for EMT and a Snap-In ends for AC/MC cables and flexible metal conduit.

Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables.

280SPMB and 281SPMB are Patented. US Patent 8,487,197; 8,274,000; 6,765,143. 287-XS through 290-XS are Patented. US Patent 8,690,194; D691,963; D689,026

ETL Listed: 287-XS, 288-XS, 289-XS, 290-XS

Transition Fittings

Mighty-Merge® Transition Couplings

Coupling used to join duplex AC/MC cable or flexible metal conduit to EMT. Set screw type transitional fitting ideal for commercial and institutional facilities. A labor savings, compared to the traditional junction box installation. Simply remove the armor and expose the length of conductors to reach the device box or enclosure. Insert FMC or AC/MC until visible in inspection holes. Refer to the cable connector compatibility charts in the technical guide section for MCI-A and other cables. Patented.

Steel Cord Grip Connectors, Straight

Bridgeport's line of high quality, made in the USA, cord grip fittings is the electrician's smart choice. Each fitting is identified by a color coded grommet

that clearly indicates the minimum-maximum cable diameter range for which the connector can be used. Bridgeport's cord grips meet the requirements of rugged service on all types of equipment, in all non-hazardous areas. Our 105°C rated neoprene sealing grommets grip the cable jacket firmly but safely providing strain relief and protecting the internal wiring connections from tension on the cable or cord. The steel washer reduces friction between the grommet and the compression nut to provide even pressure distribution, eliminating leakage resulting from grommet distortion. NPT Thread. Polypropylene or Polyethylene gasket. NEMA TYPE 2,3,3R, 4 & 12.

 File No. E11259

Aluminum Cord Grip Connectors, Straight

Bridgeport's line of high quality, made in the USA, cord grip fittings is the electrician's smart choice. Each fitting is identified by a color coded grommet

that clearly indicates the minimum-maximum cable diameter range for which the connector can be used. Bridgeport's cord grips meet the requirements of rugged service on all types of equipment, in all non-hazardous areas. Our 105°C rated neoprene sealing grommets grip the cable jacket firmly but safely providing strain relief and protecting the internal wiring connections from tension on the cable or cord. The washer reduces friction between the grommet and the compression nut to provide even pressure distribution, eliminating leakage resulting from grommet distortion. NPT Thread. Polypropylene or Polyethylene gasket. NEMA TYPE 2,3,3R, 4 & 12.

Cable Supports

NMCB-1

NMCB-2

NMCB-1 positions and supports nonmetallic and AC/MC cable. Also suitable for use with low voltage cabling to 3/8" diameter. Furnished with (2) No. 8 screws for use on wood or steel stud. Complies with NEC Articles 300.4(D) and 320.23(B). Patented.

NMCB-2 is provided with a nail for use on wood studs or 3/4" thick furring strips to position nonmetallic sheath cable. Capable of positioning nonmetallic cables in each of three rectangular slots. May also be used with low voltage cable. Low profile design and unique self-locking fingers prevent accidental removal of cables. Grooved nail for extra gripping with stud. Patented. US Patent D534,060.

Mighty-Bite® Push-EMT® Grounding Bushings

Used to ground EMT mechanically protecting Voice/Data cables. Push-EMT grounding connectors provide a convenient integral grounding lug with a captive nylon 105°C insulator. Meets NEC, ANSI and TIA/EIA-568 standards for cabling in commercial buildings.

Prefab for more productivity in the field. Patented.
US Patent D749,047; D733,064; 9,257,795.

Solar Panel Grounding Connector

Tin Plated Aluminum with Stainless Steel Hardware

Catalog Number	Wire Capacity	Unit Qty.	Std. Pkg.
ALI-SLR	4 to 14	25	250

Designed to prevent galvanic reactions and enhance conductivity. The connector body has extruded serrations for breaking the anodized finish on photovoltaic modules and frames. The serrations in the wire binding break corrosion on the grounding wire which means that no surface preparation is required for the PV module, the frame or the ground wire. The unique clamp-on design means no mounting holes are required. The connector simply clamps onto the frame of the solar panel. The unit is UL 467 Listed and accommodates aluminum or copper conductor. The connectors feature stainless steel hardware.

 File No. E20412

Wire Mesh Cable Tray Grounding/Bonding Lug

Tin Plated Aluminum with Stainless Steel Hardware

Catalog Number	Wire Capacity	Unit Qty.	Std. Pkg.
ALI-WMCT	4 to 14	25	250

Wire Mesh Cable tray bonding and grounding lugs securely attach a grounding conductor to cable tray to provide grounding continuity for the cable tray system. These items meet NEC Code requirements under NEC Article 250.96(A).

 File No. E20412

Bonding Jumper Assembly

Use Bonding Jumper Assembly to comply with Article 250 of the National Electrical Code. Suitable for use on EMT, rigid conduit, or copper water pipe. If used with expansion coupling: assemble ground clamp to conduit one inch from stationary end of coupling. Attach second ground clamp two inches from sliding end of expansion coupling. Assembly features bronze ground clamps and copper bonding strip.

Low cost and easy to use connector for securing grounding conductors at the enclosure in accordance with National Electrical Code (NEC) Article 250.8. Selection of conductor size to be made per NEC Article 250.66. Suitable for service entrance grounding. Product advantages include:

- Precision machined brass body with zinc die cast locknut and stainless steel set screw
- Professional installation appearance
- Serrated locknut removes residual paint from box
- Tamper Resistant as locknut and set screw are mounted inside the box
- Low profile flange on outside of box clearly marked with application guideline for ease in AHJ inspection
- UL Listed for grounding per UL467

Patented. US Patent D651,569; 7,901,256.

 File No. E20412: MC-100

Mighty-Bond® Enclosure Grounding Couplings

Low cost and easy to use coupling for use with rigid conduit and for securing grounding conductors at the enclosure in accordance with National Electrical Code (NEC) Article 250.8. Selection of conductor size to be made per NEC Article 250.66. Suitable for service entrance grounding. Product advantages include:

- Precision machined brass body with zinc die cast locknut and stainless steel set screw
- Professional installation
- Serrated locknut removes residual paint from box
- Use with rigid metallic or PVC rigid conduit
- Low profile flange on inside of box clearly marked with application guideline for ease in AHJ inspection
- UL Listed for grounding per UL467

Patented. US Patent D657,316; 7,927,157.

Mighty-Bond® Raintight Grounding and Bonding Hubs

MCH-075

MCH-100

MCH-200

Raintight Grounding and Bonding Hubs provide a listed method of bonding between ground electrode conductors (GEC), grounded conductors, bonding jumpers, and boxes, devices or enclosures. Female NPT Threads, Male NPSM Threads. Buna-N O-ring. NEMA TYPE 2,3,3R, 4.

The MCH is listed for use in wet locations. When connected to rigid metal conduit, the MCH will also function as a raceway bonding hub, yoke or choke. Setting the conductor set screw bonds the MCH to the raceway, the bonding or grounding conductor, and to the enclosure without the need for an external lug. Note: Not for use in concentric knockouts. Patented. US Patent D703,519; 8,410,378.

Mighty-Bond® Intersystem Bonding Bridge with Enclosure Grounding Coupling Kit

Intersystem Bonding Bridge with Enclosure Grounding Coupling is used for securing and bonding ground electrode conductors to the enclosure in accordance with the National Electrical Code (NEC) Article 250. The MBG-050 and MBG-075 are also designed to connect the raceway of the ground electrode conductor to the enclosure while providing three accessible intersystem bonding termination points. Saves installation time! Patented. US Patent 8,809,680; D626,087; D657,316; 7,927,157.

Mighty-Bond® Direct Burial Single Bolt Grounding Clamps

Designed for the grounding and bonding of electrical and plumbing systems. The SDB series are constructed of bronze and assembled with stainless steel hardware and are available in three distinct styles: lay-in lug, copper lug and enclosed style. The SDB series are listed for attachment to EMT, rigid conduit raceways and steel and copper water piping systems. Patented. US Patent 8,021,169.

Cable Supports

NMCB-1

NMCB-3

NMCB-1 positions and supports nonmetallic and AC/MC cable. Also suitable for use with low voltage cabling to 3/8" diameter. Furnished with (2) No. 8 screws for use on wood or steel stud. Complies with NEC Articles 300.4(D) and 320.23(B). Patented.

NMCB-3 is provided with nails for use on wood studs or 3/4" thick furring strips to position and support AC/MC cables. May also be attached to metal studs or enclosures, or concrete block with No. 6 round head screws. Mounts in either horizontal or vertical direction. Low profile design and unique dimpled slots prevent accidental removal of cables. Patented.

File No. E161206

Cable Supports

NMCB-2 is provided with a nail for use on wood studs or 3/4" thick furring strips to position nonmetallic sheath cable. Capable of positioning nonmetallic cables in each of three rectangular slots. May also be used with low voltage cable. Low profile design and unique self-locking fingers prevent accidental removal of cables. Grooved nail for extra gripping with stud. Patented. US Patent D534,060.

File No. E161206

Mighty-Hold™ Universal Straps

For AC/MC/MCI-A cable and flexible metal conduit. The US-6171 also supports Jacketed AC/MC/MCI-A. Secures multiple sizes. Patented. US Patent D644,613.

Grounding Hubs

Used to secure threaded rigid service entrance conduit to box or enclosure. Bridgeport Grounding Hubs provide a point of attachment for a ground wire per 2014 NEC Article 250.92(B). Listed for use in wet locations. Female NPT Threads, Male NPSM Threads. Buna-N sealing ring. NEMA TYPE 2,3,3R, 4.

Listed

Two Screw Strap Type Connectors

Round Cable

Oval Cable

Used for connecting round or oval service cable to box or enclosure.

Electrical Box Extender / Insulator

BXE-100

BXE-300

For use with most metallic or nonmetallic electrical boxes to extend box face. Simply slide non-conductive extender into box to correct setbacks up to 1". May also be used as an insulating barrier between metallic box and device. Extender / Insulator does not require trimming and is completely hidden by faceplate. Complies with NEC Article 314.20. Patented. US Patent 7,002,076; 6,953,894

Available in single gang BXE-100, duplex BXE-200 or round BXE-300 configurations.

 File No. E216710

Communications / Data Plate Mounting Bracket (Old Work)

Eliminates need for outlet box. Provides mounting base for securing communication or data line face plates. Mounts standard low voltage outlets and plates (Class 2 only). Hardware included.

Zinc Plated Steel

Catalog Number	Unit Qty.	Std. Pkg.
LVB-1	10	100

Cable Supports

NMCB-1

NMCB-2

Positions and supports nonmetallic and AC/MC cables. Also suitable for use with low voltage cabling to 3/8" diameter. Furnished with (2) No. 8 screws for use on wood or steel stud. Complies with NEC Articles 300.4(D) and 320.23(B). Patented.

UL File No. E161206

NMCB-2 is provided with a nail for use on wood studs or 3/4" thick furring strips to position nonmetallic sheath cable. Capable of positioning a nonmetallic cable in each of three rectangular slots. May also be used with low voltage cable. Low profile design and unique self-locking fingers prevent accidental removal of cables. Grooved nail for extra gripping with stud. Patented. US Patent D534,060.

UL File No. E161206

Cable Stacker

Metal Stud

Wood Stud

For use on steel or wood studs to support nonmetallic sheath, communication, and data cables. Furnished with nail for wood stud. Use No. 8 x 1/2" self-tapping sheet metal screw for steel stud. Complies with NEC Articles 300-4(D) and 320.23(B). Patented.

Dome Light Stations

Used to indicate the need for personal assistance in nursing homes, health care facilities, bathrooms and other areas where people frequent. Stations are provided with both red and white domes. Simply discard the dome that is not intended for use. Units are available with and without an audible buzzer in both 24VAC and 120VAC. They may be purchased as standalone stations or as call for aid packages. All units feature 2 internal lamps and a stainless steel faceplate.

cULus File No. E313390

Catalog Number	Description	Dome Color
CA-101-24	24VAC dome light with buzzer, pull switch and transformer	White or Red
CA-101-120	120VAC dome light with buzzer and pull switch	White or Red

Pull Cord Station

Provides for emergency call activation by pulling the supplied nylon cord downward. The call is reset at the station by simply pushing the activation switch upward. The station mounts in a standard single gang box. The units' stainless steel faceplate is marked "Emergency Pull For Help". 6 amps at 125VAC. DPST Switch.

cULus File No. E313390

Catalog Number	Description	Mounting
CA-PS	Pull Cord Station	Single Gang Box

Duct Seal

Catalog Number	Slug Size	Std. Pkg.
DS-100	1 lb.	50 Slugs
DS-500	5 lb.	10 Slugs

Used to seal around boxes, flashings and service entries. #1003 asbestos-free sealing compound is pliable, non-corrosive to metals and can be painted. For both indoor and outdoor use.

 File No. R14730

Firestop

Catalog Number	Cartridge Size	Unit Qty.	Std. Pkg.
FS-1000	10.5 fluid ounces	1	12

A water-based, non-corrosive, non-toxic, odorless quality intumescent. The FS-1000 is rated 3000°F for 8 hours. Adheres to most construction materials including ceramics, composites, masonry, metal, plastic and wood. Can be safely removed with soap and water prior to curing. Paintable and sandable. Refer to www.bptfittings.com for installation instructions. Classified by Underwriters Laboratories as a non-combustible product in compliance with zero flame and zero smoke index.

 File No. R25422

Door Light Switches

All purpose electric door switches for use anywhere that lights are turned on and off automatically by the opening and closing of a door. Units may be wired either normally open or normally closed. The units are shipped normally closed. The switch mounts using the 3" (76mm) on center mounting holes.

Units may be used on sliding or on hinged doors. Typical applications include closet doors, walk-in refrigerators, vault and photo labs. Models available for standard or narrow construction; refer to www.bptfittings.com for dimensions.

 Listed.

		24	20
		8	20
		16	20
T-604	120VAC	24	30
		24	40
		24	40

Low cost, highly reliable transformers that provide convenient low voltage power for a variety of commercial, residential and industrial purposes. All primary leads are pre-stripped for quick connection. Units mount in a standard 1/2" (13mm) knockout or surface mount using the provided locknut or clamp. The T-601 uses a standard locknut. The T-602, T603 and T-604 use an integral clamp. These transformers may be safely mounted in both plastic and metal back boxes.

The T-601 is ideal for doorbells, chimes and other light duty applications. The T-602, T-603 and T-604 offer higher power for longer wire runs.

 Certified

HOW TO USE THIS GUIDE

This guide has been developed as an easy to use, technical reference for specifiers, contractors, and inspection authorities. It is intended for use as a guide in the selection of electrical fittings manufactured by Bridgeport Fittings, Inc. Do not use this manual as an interpretation of the National Electrical Code or local regulations. Always consult your local electrical inspector for requirements in your area.

Underwriters Laboratories, Canadian Standards Association, and Federal Specifications are current at time of publication, but are subject to change without prior notice. Current listings are noted on the smallest unit carton label. Look for the appropriate logo.

Due to ongoing product improvements or code changes, specifications and dimensions are subject to change without prior notice. For current product dimensions, consult our on-line catalog at www.bptfittings.com, or contact us.

For further assistance regarding information included in this guide, please call our Engineering Department at 203.377.5944.

DETAILED STANDARDS

The standards by which conduit fittings are manufactured are maintained on a current basis at the Bridgeport factory. (See Appendix IV)

All questions relating to the application of these standards are welcomed. Included are relevant Underwriters' laboratories standards, Federal Specifications, and ASTM and ANSI Standards. See Appendix I, II, & III to determine the applicability of appropriate CSA, UL, NEMA, and Federal Specifications identification, standard and file numbers.

NEC REFERENCES

National Electrical Code articles are referenced here. Included are those parts pertaining directly to use of fittings supplied by Bridgeport, together with those parts pertaining to conduits and cables for which such fittings are designed.

If you or your specifying engineers have any further questions about the application or interpretation of the NEC installations involving Bridgeport fittings, please call Bridgeport's engineering department.

Occasionally, contractors can make use of factory personnel or other resources to permit the use or substitution of Bridgeport for a specified brand or material of construction. This may enable you to standardize floor and truck inventories in order to simplify material specification and inventory investment.

DISSIMILAR METALS

The NEC requires, where applicable, dissimilar metals in contact anywhere in the system shall be avoided to eliminate the possibility of galvanic action (NEC Articles 110.14 & 250.70), Steel EMT, steel rigid conduit, steel straps and hangers, and steel outlet and junction boxes are almost universally plated or coated with zinc or other corrosion inhibitor. Wherever Bridgeport's fittings come in contact with these raceway components, similar metals are touching, since the fittings themselves are constructed of zinc or have zinc-plated steel parts. Use of our products in the application for which they are designed, will be compliant to this requirement.

Note: Zinc base alloy ingot for die casting may contain nickel, chromium, silicon, and manganese in amounts up to their solubility (0.02%, 0.02%, 0.035%, and about 0.5% respectively) at the freezing temperature.

No harmful effects have ever been noted due to the presence of these elements in these concentrations, and therefore analyses are not required for these elements.

Die Cast Zinc, Alloy #3 (ZAMAK)

Mechanical Properties (as cast)

Tensile Strength, PSI	41000
Impact Strength - Ft./Lbs. Charpy	40
Brinell Hardness, 500kg 20mm 30 sec	76
Elongation in 2", %	14
Shear Strength, PSI	31000
Compressive Strength	60000
Mod. of Rupture, PSI	95000

Physical Properties

Melting Point (°F)	728
Density (Lbs./Cu. In.)	.240
Coefficient of Thermal Expansion (uIn./In. x 10 - 6 Deg. F)	15.2
Specific Conductivity	.10
Thermal Conductivity (Cal./Sec. Sq.-Cm./Degrees C)	.27
Elec.Conductivity,%Cu Std.	26

APPENDIX VI (continued)

Sand Cast Zinc, Alloy ZA-12

Mechanical Properties (as cast)

Tensile Strength, PSI	40000-45000
Yield Strength .2% Offset, PSI	3000
Elongation in 2", %	1-3
Brinell Hardness	92-96

Physical Properties

Melting Point (°F)	710-810
Density (Lbs./Cu. In.)	.218
Elec.Conductivity (% IACS)	25

Chemical Compositions %

Al	11
Mg	.02
Cu	.75
Zn	Remainder

Die Cast Aluminum, Alloy 380

Mechanical Properties (as cast)

Tensile Strength, PSI	46000
Yield Strength, PSI	23000
Elongation in 2", %	2.5
Brinell Hardness	80

Physical Properties

Solid temperature Range, (°F)	1000-1100
Density (Lbs./Cu. In.)	.098
Electrical Conductivity (% IACS)	23

Chemical Compositions %

Si	7.5-9.5
Cu	3.0-4.0
Mg Max.	0.10
Zn Max.	3.0
Fe Max.	2.0
Mn Max.	0.50
Al	Remainder

Sand Cast Malleable Iron, Ferritic

Mechanical Properties (as cast)

Min. Tensile Strength, PSI	50000
Min. Yield Strength, PSI	32000
Min. Elongation in 2", %	10
Brinell Hardness	156

Standards

ASTM Spec. A-47-77	Grade 32510
SAE Spec. J158	Grade M3210

Sand Cast Ductile Iron

Mechanical Properties (as cast)

Min. Tensile Strength, PSI	60000
Min. Yield Strength, PSI	40000
Min. Elongation in 2", %	18

Standards

ASTM A536-80	Grade 32510
MIL-I-11466	Class 6

Sand Cast Yellow Brass

Mechanical Properties (as cast)

Min. Tensile Strength, PSI	38000
Min. Yield Strength, PSI	-
Min. Elongation in 2", %	17

Standards

Commercial Grade

Sand Cast Red Brass (Bronze)

Mechanical Properties (as cast)

Min. Tensile Strength, PSI	37000
Min. Yield Strength, PSI	-
Min. Elongation in 2", %	17

Standards

ASTM B-62-52, B-145-52-4A
MIL-B-16444
SAE 40

Note: The size and ampacity of conductors and conduits are based on the 2014 NEC and are just suggested sizes.

Installation FAQ's

The following FAQ'S are not an interpretation of the National Electrical Code (NEC) or local regulations. Always consult your local electrical inspector for specific requirements in your area.

Why Can't Plastic Insulating Bushings Be Used To Connect A Conduit To An Enclosure?

Plastic insulating bushings must be used in conjunction with two locknuts when connecting threaded rigid or IMC conduit, containing No. 4 or larger un-grounded conductors, to boxes or enclosures.

Bushings composed entirely of plastic cannot be used to secure conduit to the enclosure. A locknut is required on the inside and outside of the enclosure in addition to the plastic insulating bushing.

Temperature rating of the plastic insulating bushing must not be less than the insulation rating of the conductors.

What Is The Proper Method For Securing AC and MC Cables?

NEC Articles 320.30 and 330.30 denotes the different requirements for securing Armored and Metal Clad cables. Although similar in appearance, each cable has unique requirements.

Armored cable [NEC Article 320.30(C)] must be secured at intervals not exceeding 4-1/2 feet and within 12" of box or fitting.

Metal Clad cable [NEC Article 330.30(B)] must be secured at least every 6 feet. Cables with four or fewer conductors "sized 10 AWG or less" must be secured within 12" of box or fitting.

Why Use Steel Safety Plates?

NEC Article 300.4(F) specifies that cable or raceway-type wiring may be installed in wooden stud grooves, to be covered by wallboard or similar covering, if protected by 1/16" thick steel plate. The steel plate must have the same width as the stud, and must be securely fastened to the stud.

Why Do "Concrete-Tight" Listed Fittings Need Tape?

Raceway systems such as EMT and rigid conduit are permitted by most codes to be embedded in concrete. The solid exterior of these conduits eliminates the possibility of concrete entrance, however, the termination with the connector or coupling can be susceptible to concrete entering the raceway.

The UL 514B testing procedure requires the connector or coupling to be assembled to the conduit inside a special concrete form. Then Portland-type concrete is poured into the form and over test samples. Then the concrete slurry is vibrated to remove any trapped air, and allowed to cure. After concrete curing, the fittings are chipped out of the concrete and examined for concrete penetration.

Although compression style connectors and couplings pass these tests in all trade sizes because of the gland ring design, the set screw types may have difficulty conforming to UL or CSA concrete penetration requirements. When the set screw is tightened onto the conduit, the fitting and/or conduit material will "yield", or stretch, enough to create an opening at the conduit/fitting connection.

Set screw fittings in the smaller (1/2", 3/4", and 1") trade sizes are less likely to stretch to the point that would permit entrance of concrete. However, 1-1/4" and larger size fittings will yield enough so that concrete can enter the raceway. UL and CSA will accept product carton marking that specify "Concrete-Tight When Taped" on fittings that cannot pass testing, since the tape prevents entrance of concrete into the raceway. The taped joint must completely encircle the conduit/fitting connection. We recommend using duct tape or similar type of durable tape.

What Are The NEC Requirements For Use Of an Anti-Short Bushing?

When installing ARMORED CABLE (Type AC), NEC Article 320 mandates the use of a insulating bushing (commonly referred to as Anti-Short or Redhead) between the metal sheath and the conductors. Fittings with insulated throats are not a substitute for the anti-short bushing.

When installing METAL-CLAD CABLE (Type MC), the NEC does not require the use of a Anti-Short insulating bushing. MC Cable conductors are usually wrapped with Mylar tape for protection; use of anti-short bushing is optional unless specified otherwise by the cable manufacturer.

Can Liquid Tight Connectors Be Used For Class 1, Div 2 Locations?

NEC Article 501.30(B), exception (1), (2), (3) will permit the use of liquidtight flexible metal conduit and liquidtight connectors to be the sole equipment grounding conductor in Class 1, Division 2 locations. However, strict requirements must be met:

- Conduit and connectors must be UL listed.
- Conduit cannot exceed 6 feet in length.
- Over-current protection in the circuit is limited to 10 amperes or less.
- It supplies other than power utilization loads.

Can Beam Clamps Be UL Listed?

In 1998, UL began listing electrical hardware devices such as Beam Clamps. This was at the request of the electrical industry, including contractors, who became confused regarding the correct application and strength of Beam Clamps.

UL Listed Beam Clamps are manufactured from malleable iron or steel with a hardened screw to secure the clamp to the beam. Clamps are tapped in two places for attachment of threaded rod, conduit hanger, or bridle ring.

UL Listed beam clamps are only for use with rigid, IMC, or EMT conduits. Spacing of clamps must comply with strap requirements found in the National Electrical Code.

Refer to Bridgeport's carton label for conduit size and type, maximum loading, screw torque, or any special assembly requirements.

What Is The Difference Between Metal Clad and Armored Cable Connectors?

NEC Article 300.15 specifies that fittings can only be used with wiring methods for which they are designed and listed. Most manufacturers have received dual usage listings for these types of connectors; however, you should not assume all fittings have the dual listing. While the appearance of Metal Clad (MC) and Armored Cable (AC) connectors may be similar, the misuse of an AC cable connector can be significant enough to cause an unsafe installation with metal clad cable.

During the listing process at Underwriters Laboratories (UL), MC connectors are subjected to more stringent testing than a typical AC connector. Additional tests are necessary to comply with application requirements of metal clad cable in the NEC.

UL Listed metal clad cable connectors are suitable for grounding when installed in accordance with the NEC. 'Dry Type' MC connectors may be 'concrete tight' when taped and used with PVC coated metal clad cable (PVC jacket stripped back to fitting end stop).

Always refer to the carton label for listed cable type (corrugated, interlocked, or smooth) and material (aluminum or steel). The label will also specify the cable size range. Do not use cable smaller than noted on label; the clamping mechanism on the fitting will not function correctly and grounding integrity will be compromised.

The newest type of MC Cable - MCI-A, may require use of a special connector. Such fittings have been listed by UL for use with this cable type.

Can Conduit Bodies Contain Splices?

Although different manufacturers' conduit bodies may look the same, not all are suitable for 'approved' installations. Specific NEC requirements determine which conduit bodies may contain splices, taps, or devices.

Conduit bodies provide access to the conduit system through a removable cover at a junction of two or more entries. Bodies may be used for changing the direction of the wiring systems, to aid in pulling of long wire runs, or to mount devices or make splices.

UL can 'list' conduit bodies as a fitting, which is tested under specification UL 514B. However, a fitting cannot contain a device or splice. UL can also 'list' the conduit body as a box, tested under specification UL 514A. Only the conduit body listed as a box is suitable for use with a device, splices, or taps.

Conduit bodies listed for use with splices, taps, or devices must be marked with the cubic inch volume and any special installation requirements, such as the use of wire pulling compound. The conduit body may also be marked with the maximum wire capacity if the body does not meet the NEC end stop to end stop dimensional requirement for wire pulling: 8 times the trade size for straight pulls, 6 times the trade size for angled pulls.

Are Snap-in Type Metal Clad And Armored Cable Fittings Suitable For Grounding?

AC and MC snap-in type connectors are capable of withstanding ground fault currents likely to be imposed on them, and offer equivalent grounding protection as locknut type connectors.

During the listing process at UL, AC and MC connectors are assembled to cable and subjected to a ground fault current test. These tests are necessary to comply with application requirements in the NEC.

Are Snap-in Type Fittings Tested To The Same Requirements As Locknut Type Fittings?

UL listing requirements are identical for both snap-in and locknut types of fittings. This includes assembly, bending, resistance, pull test, repeated resistance, and a ground fault current test.

Snap-in type connectors are required by code to be capable of withstanding ground fault current likely to be imposed on them, and offer equivalent grounding protection as locknut type connectors. Many snap-in products are used to reduce installation time or where tightening a locknut may be difficult.

UL Listed armored and metal clad cable connectors are suitable for grounding when installed in accordance with the NEC.

Always refer to the carton label for listed cable type and material (aluminum or steel). The label will also specify the cable size range. Do not use cable smaller than noted on label, the clamping mechanism on the fitting may not function correctly and grounding integrity will be compromised.

Bridgeport's snap-in fittings are designed only to work with UL Listed steel boxes which have a nominal .063" wall thickness. Use with boxes made in other materials (i.e. plastic) or other thicknesses, is not recommended nor approved.

Are All Clamp-Type Connectors Suitable For Use With Multiple Nonmetallic Sheath Cables?

UL Listed nonmetallic (NM) sheath cable connectors are suitable for use with a single cable unless specifically tested for two cable usage.

A concern with two cable usage is the fitting's ability to withstand cable pullout forces normally encountered during installation. Per UL 514B, each cable is subjected to an individual pull test. In addition, UL tests strap type connectors to ensure that when tightening the strap screws, the strap will not pierce the nonmetallic sheath of the cable, creating a possible short.

Bridgeport's Carton shipping labels will specify the type and number of nonmetallic cables for which the fitting has been UL Listed. Do not exceed the UL rating.

Are Compression Raintight Fittings Really Rain-Tight?

In 2002, UL received field complaints that listed EMT compression split ring type rain-tight fittings were permitting the entrance of water into the conduit system. After checking the validity of these claims, UL made the decision to de-list ALL fitting manufacturers' compression type raintight connectors and couplings.

A revised test method was employed by UL to represent actual field applications and conditions.

Bridgeport was the first to develop and release an updated version of connector that met this revised requirement. Other fitting manufacturers followed suit, with different configurations to pass the UL test requirement. Some of these designs include internal plastic sealing devices, or compression gland rings without a split, and external sealing device on the locknut threads to prevent water entering the box. Regardless of the design, all have to pass the same UL raintight test parameters.

Is A Ground Clamp UL Listed To Be Used To Bond Flexible Or Nonmetallic Gas Piping?

2011 NEC, Article 250.52(B) (1) states "(B) *Electrodes Not Permitted for Grounding* - (1) Metal underground gas piping system". Gas piping by itself cannot be used as Ground Electrode Conductors.

However, NEC Article 250.104, (B) *Other Metal Piping* - "The equipment grounding conductor for the circuit that is likely to energize the piping systems shall be permitted to serve as the bonding means." Gas piping may be bonded only if it's likely to be possibly energized by the equipment it is connected to. Most of the time, the piping will be bonded to the system automatically due to its metal fittings. However, in the case of nonmetallic or flexible gas piping, a bonding jumper may need to be provided to complete the bonding path around the nonmetallic or flexible sections.

There is an important difference worth noting. Grounding is not the same as Bonding. They are considered separate requirements by the NEC. Gas piping cannot be used for grounding, but it can be bonded if necessary.

Flexible gas pipe system manufacturers will specify the method and system of bonding. In most cases, the clamp is placed on the metal hex fitting rather than over the flexible metal or nonmetallic tube. As an example, the following is an excerpt from Gastite's® CSST Installation Guide:

"The piping is permanently and directly connected to the electrical service equipment enclosure, the grounded conductor at the electrical service, the grounding electrode conductor (where of sufficient size) or to one or more of the grounding electrodes used. A single bond shall be made at or near the service entrance of the structure or the gas meter of each individual housing unit within a multi-family structure. The bonding conductor shall be 6 AWG copper wire. Bonding jumpers shall be attached in an approved manner in accordance with NEC-2005 Article 250.70 and the point of attachment for the bonding jumper shall be accessible.

Bonding/grounding clamps listed to UL 467 comply with this requirement. This bond is in addition to any other bonding requirements as specified by local codes."

Bridgeport's ground clamps are not UL Listed individually to be used in a gas pipe bonding application - only to the basic standalone UL specification (UL 467).

What Connector Should I use for Health Care Facilities?

There are two armored Health Care Facility (HFC) cables recognized by Underwriters Laboratories: Type AC and Type MCI-A available in Steel or Aluminum interlocked armor.

Please reference our web site at www.bptfittings.com for specific product specifications. Keep in mind that while many of our Whipper-Snap and Locknut styles connectors are suitable for MCI-A cable some are not.

When a green identification is required or specified, Bridgeport's type 570-GI can be used to provide confirmation that the right cable has been terminated.

Bridgeport's connectors are UL Listed under UL file number E-20534. The listing is proof of the products performance as an effective ground-fault current path, and can be confirmed via the (UL) website www.UL.com.

BUSHINGS REDEFINED.

MIGHTY-RITE® SPLIT BUSHINGS
DO MORE THAN JUST PROTECT CONDUCTORS.

1/2 TO 6-INCH TRADE SIZES

1 TO 4-INCH TRADE SIZES

3/4 TO 4-INCH TRADE SIZES

NO MORE BURNING THROUGH BUSHINGS OR FIGHTING WITH PULLERS.

Install your bushings after pulling wire. MIGHTY-RITE's innovative hinge adjusts and aligns easier – even in tight spots. Our adjustable lay-in lugs position conductors for easy alignment and access; and our self-aligning latches provide a simple, one-handed install. That's the new definition of bushing innovation. Only from Bridgeport.

See the Difference a bushing can make on your next job.

SQUEEZE EVERY SECOND OF SAVINGS.

SAVE TIME, BOOST QUALITY
AND JUICE PRODUCTIVITY.
