

PD-25 Auto Handy™

With Automatic Feed

It's a Hand Tool. It's a Power Tool. It's Both!

Clearing clogged sink, tub and laundry drains is easier with the PD-25 Auto Handy™ with automatic feed. We've miniaturized our big machine power cable feed and put it on the Handy to give you feeding speed and convenience you haven't seen before in a hand-operated drain cleaner. Operate the PD-25 Auto Handy as a hand tool - or a power tool! Simply remove the turning handle and attach a 3/8" or 1/2" electric drill for extra muscle on tough clogs.

Designed to take the toughest field abuse, the sturdy plastic container has been drop tested from 8 feet - fully loaded - without damage. That's more than twice the height of a standard test.

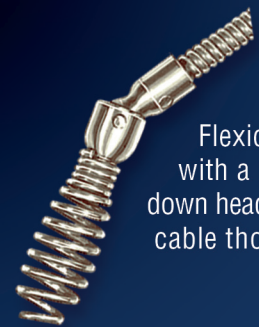

To feed the cable, just squeeze the feed lever as the container rotates; to retract it, reverse the rotation and squeeze the lever. The feed handles 1/4", 5/16" and 3/8" cables. No adjustment, disassembly, or additional parts required.

With a capacity of 50 ft. of 1/4" or 5/16", and up to 35 ft. of 3/8" Flexicore® cable, the PD-25 Auto Handy easily clears clogs in sink, shower, toilet, and laundry drain lines from 1-1/4" to 3" in diameter.

Of course, the drain cables are Flexicore® – with an integral wire rope center. Flexicore cables are coiled tightly over a core of aircraft-type wire rope – then heat-treated – giving the cables outstanding strength without sacrificing flexibility. Nobody makes cables like General.

Flexicore cables come with a regular head or a down head to maneuver the cable through tight bends.
