Madison Electric Legacy...

For over 90 years, Madison Electric Products, Inc. has worked to establish a reputation as a trusted supplier to our valued business partners throughout the electrical industry. So much work was done prior to my arrival in 2008. Since then, we have worked hard to build on that legacy. I have the privilege to work alongside our team of dedicated employees on a daily basis. Our goal is to make sure that we continue to earn your trust through our people, products and service. We know that you are the reason we exist.

At the center of our business is the Sparks Innovation Center. This award winning new-product incubator has yielded many innovative and labor savings products over the years, with the goal of addressing real challenges faced by distributors, installers and end users throughout the industry. These product innovations help to enhance our overall product offering. I hope that you have found some of these products to be beneficial to you and your business.

This latest edition of our product catalog highlights our entire product offering, including many new Sparks Innovation product solutions. In addition, please be sure to visit us online at www.meproducts.net. Here you will find additional product information, cross reference tools, video libraries and the latest ME news. I also invite you to connect with us via one of our various social media channels, including Facebook, LinkedIn, YouTube and Instagram.

As always, we value any feedback related to how we can better serve you, our valued customer.

On behalf of our team of dedicated and talented employees, I want to thank you for your continued support and trust in ME.

Best Regards,

A handwritten signature in black ink that reads 'Brad Wiandt'.

about

Madison Electric Products

Madison Electric Products provides over 2,500 field-tested and field-created products developed by electricians for electricians. Headquartered in northeast Ohio, Madison Electric Products boasts a customer service oriented coast-to-coast network of sales reps and distribution centers.

Madison Electric Products is built upon a legacy of product innovation, an ongoing commitment to superior customer service and product quality, and a dynamic and progressive management team that establishes open, one-on-one relationships with company partners, including customers, distributors, manufacturers, and inventors.

HISTORY & LEADERSHIP

Madison Electric Products was founded in Cleveland in 1929 by Earl Atkinson, an electrician and inventor of the Madison Strap, one of the electrical industry's most relied-upon and favorite products. At the helm of Madison Electric Products today is President Brad Wiandt and his team of experienced electrical industry veterans.

OUR BRAND

Madison Electric is revolutionizing the electrical distribution market with new attitudes, new processes, new procedures and new products – growing smartly into a spirited, innovative, inspired organization built on the innovative legacy of its founders and the on-going commitment to deliver the highest quality products to customers in construction related trades, OEM and building maintenance. Over the years, Madison Electric has led the industry with field-tested and field created products developed by electricians for electricians.

Today, Madison Electric enjoys a well-deserved reputation as the innovative source and industry thought leader for product development. Our past is the foundation for our future, where a second to none customer service approach is reflected in everything we do. From the way we deal with our distributors and contractors, to the direct, one-on-one relationships we maintain with our manufacturing partners, we work hard to guarantee success, improved quality and superior performance.

DISTRIBUTION

Madison is headquartered in Solon, OH. Our distribution center in Atlanta, GA, combined with our warehousing manufacturer rep partners, gives Madison the ability to provide our customers with industry-leading customer service.

SOLON, OH

DULUTH, GA

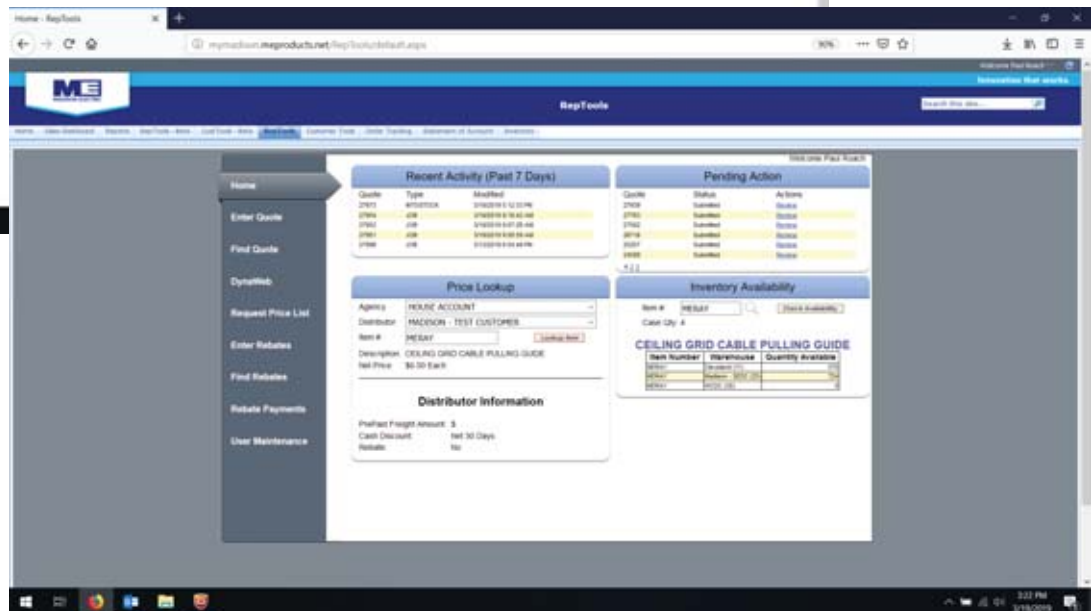

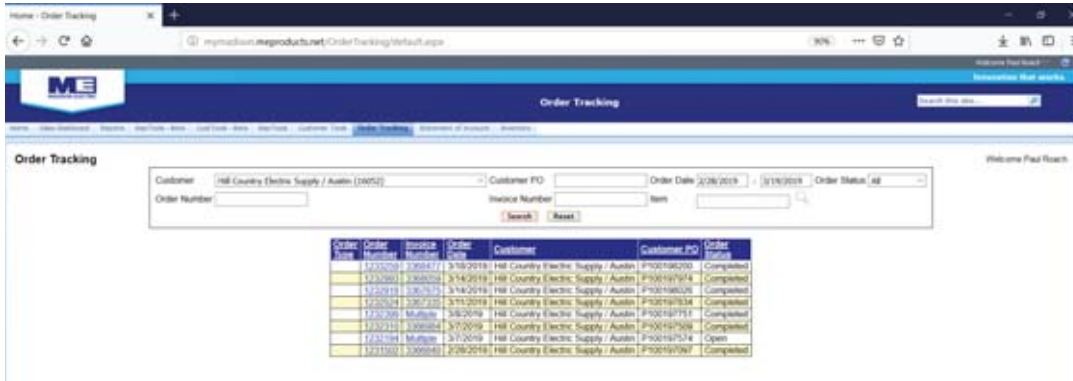

One Order. One P.O. One invoice. **FREIGHT PAID.**

There are many benefits that Madison provides to Electrical Distributors. One primary benefit is the ability for our customers to compile the purchases of several product categories into **one purchase order**, resulting in **one shipment** and **one invoice**, while reducing unnecessary business expenses. Additionally, by bundling categories of products into one simple purchase order, Madison eliminates the need to order excess product in order to qualify for **FREE FREIGHT**. Looking for innovation? We've got that too. Check out our one-of-a-kind tools and Sparks innovations that are designed to help you work smarter. Please consider Madison Electric when making your next purchase of electrical fittings, tools and accessories. Madison's wide variety of best quality, best value products can help increase your bottom line.

NOW THAT'S INNOVATION THAT WORKS!

At Madison Electric Products, innovation is what we do.

But we couldn't do it without you.

You're out in the field every day. You know what works and what doesn't. And we're sure that at some point or another you've said to yourself, "I have a great idea. I could do this better."

If you're looking for a partnership with a company that thrives on product innovation and relationships with electricians just like you, visit our Sparks Innovation Center online.

There's no commitment. While we can't guarantee that your idea will make it to market (let's face it, not every idea will) we can guarantee that we will:

- Respond to you as quickly as possible
- Consider every idea submitted
- Appreciate that you took the time to submit one!

SmartLB

Ahead of the Curve!

Unlike traditional LBs that have a sharp 90-degree corner, Smart LB conduit bodies have a built-in radius that helps prevent cables from getting caught or damaged when pulled around corners. With no sharp edges to damage cable, the gentle bend radius meets ANSI/TIA/EIA 568 & NECA/FOA requirements for pulling Optical Fiber Cable. Smart LB are the only conduit bodies that are recommended by the BICSI/TDMM 13th for telecommunication cable. Includes a gasketed cover for wet locations.

DIE CAST ALUMINUM

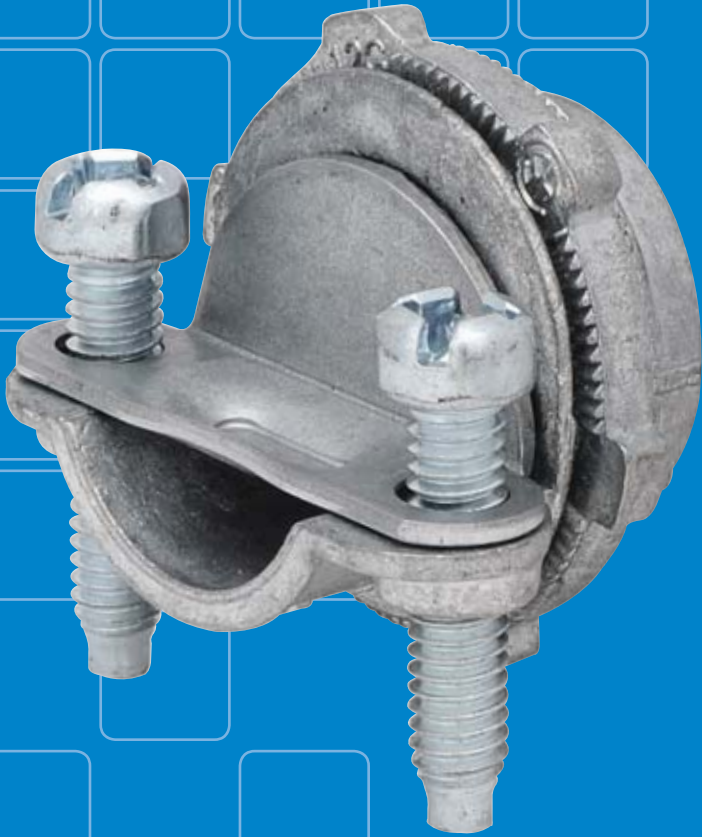

- Gray powder coat paint finish
- Suitable for indoor, outdoor (OSP) & plenum use
- For use with EMT, IMC, Rigid or Liquid-Tight conduit and fittings

PVC

- Standard gray
- Suitable for indoor / outdoor (OSP) use
- For use with schedule 40 PVC & schedule 80 PVC
- Works with standard PVC cleaner and cement

Wire Tab™

The perfect solution to lost wires!

WireTab hugs the corner of a wall stud, allowing loose wire ends to be threaded through the channel. When drywall is hung, a pre-cut hole is positioned to surround the Wire Tab channel so the wire ends are available and in the correct place.

- Holds the loose end of wire in position during construction
- Ideal for under cabinet lights, security, doorbells, speakers & more
- Small, inexpensive, and easy to use
- Eliminates costly & unsightly holes in drywall
- Can be adapted for a variety of applications, including thick walls

conduit bodies

When running conduit, having inferior conduit bodies can grind a project to a halt. Breaking or coming loose due to poor fit can cost valuable time and labor. All of Madison's conduit bodies are made from high grade aluminum or malleable iron for Rigid conduit, and aluminum for EMT. Madison produces quality at an affordable price. Available in all conduit body types and with a wide range of conduit sizes we have exactly what you need to get the job done.

EZLB

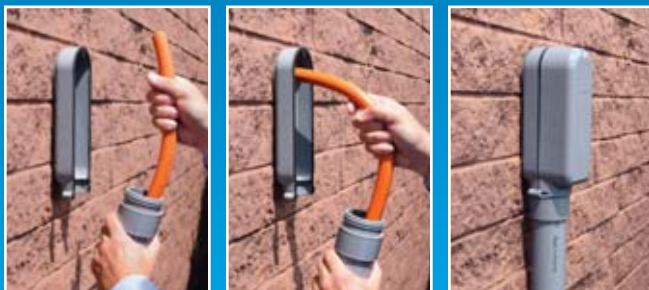

EZ as 1-2-3!

Madison's EZLB provides the most efficient method of installing large service entrance wire through a right angle opening. No more struggling to force the wire into a tight connection. Our patented 3-piece design allows the installer plenty of room to maneuver the wire into place. Splitting the EZLB in half has eliminated the pinch points that has caused electricians problems for decades. The EZLB is a one man installation saving time, money, and eliminating wire damage.

- Ideal for service entrance
- 3-piece design for easy installation
- Includes gasket for wet locations

The EZLB installs in just three simple steps:

1. Install the collar fitting onto 2" PVC pipe.
2. Bend wire at 90 degrees and install into the back half of the EZLB.
3. Finish by installing the front cover.

Madison Electric's nipples, elbows and couplings line is an extensive compilation of quality products. Just take a look to see for yourself. All of our UL listed nipples, elbows and couplings meet exacting standards rarely seen in the industry. We give you peace of mind that when you purchase from Madison, you are getting exactly what you need.

NEW WIRE TAB CABLE POSITIONING DEVICE

Holds the loose end of wire in position during construction

Material: Polyethylene

Features: WireTab hugs the corner of a wall stud, allowing loose wire ends to be threaded through the channel. When drywall is hung, a pre-cut hole is positioned to surround the Wire Tab channel so wire ends are in the correct place. Ideal for under cabinet lights, security, doorbells, speakers and more. Small, inexpensive, and easy to use. Eliminates costly and unsightly holes in drywall. Can be adapted for a variety of applications, including thick walls.

NEW WIRE BRACKET CABLE SUPPORTING DEVICE

Allows flexible and custom raceway design for line voltage and low voltage cable

Material: Nylon

Certifications: ULus Listed

Features: Dual purpose line voltage and low voltage cable supporting device. Install fewer staples and reduce the possibility of increased resistance that may trip Arc Fault & GFI breakers. Cable ties separate groups of cables, allowing more cables to be installed in a single device. Device corner holes allow cable ties to be installed. A smooth interior surface is suitable for wire pulling, especially for long distance pulls.

Notes: For residential and commercial use. Mounting holes accept tap cons, 1/4 bolts for beam clamps and light hilti loads (1.5" nail with fender washer). MC does not require cable ties when 10 or less cables are in device. Low voltage cables do not require cable ties.

ME EXCLUSIVE CLIP-IT™ STUD STRAPS

Secures MC/AC cable to studs

Material: Sturdy Polycarbonate

Certifications: cULus Listed (except MBD214-1)

Features: Holds MC/AC cable 12/2 through 10/3, eliminating the unsightly sagging you get with other supports. Can be used universally. Fits MC/AC cable 12/2 thru 10/3.

Notes: Suitable for indoor use only. No load rating. Maximum operating temperature rated 80°C.

SmartShield™

NAIL GUARD

Nail plates, reimagined.

Smart Shield's unique cylindrical shape houses wire and cable for better protection from both sides of the stud, eliminating the need for multiple standard nail plates. Smart Shield is faster and easier to install, and eliminates drywall budge caused by using surface mounted nail plates.

Manufactured with heat treated steel for strength, Smart Shield is also zinc plated to reduce electrolysis. Smart Shield is resistant to direct strikes from nail guns and screws, and preventing damage to electrical power cables, potentially shorting the conductors and starting a fire.

- Ideal for service entrance
- Provides protection to both sides of the stud
- Faster & easier to install than traditional nail plates
- Can be installed before or after cable is placed
- Safer to handle, less chance on injury caused from protruding flat plate barbs
- Won't bend when installing like flat plates

DraftSEAL

Look for the green seal!

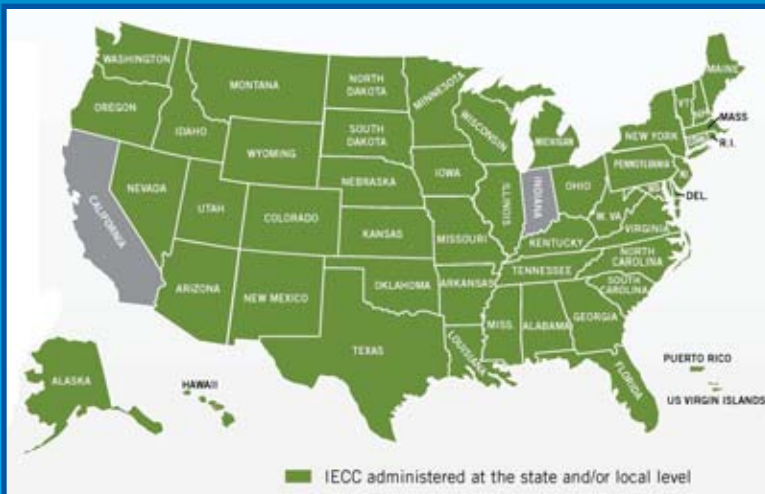

The Madison Draft Seal product is truly innovation that works. Available in 1 gang through 4 gang, plus a round kit for ceiling boxes, the Draft Seal attaches to most manufactured plastic boxes in seconds, saving time and money. Each Draft Seal kits also includes adhesive backed foam pads for a tight seal around the wires, no more messy and costly fire stop caulk.

- Easy to install
- Costs less than all-in-one pre sealed boxes
- Can be used with most major brand non-metallic boxes
- Saves time over inefficient and messy caulking methods
- Requires less inventory space
- More versatile, allowing the use of more wiring box types
- Easily identified by inspectors after the dry wall is up

The IECC is the national model energy code

The International Energy Conservation Code is administered at the state and/or local level in 48 states. The IECC requires that any time you penetrate the insulation barrier in a wall separating conditioned air from unconditioned air (also known as the envelope), the wiring box must be sealed. There are approximately 64 boxes in the envelope in a typical 2200 sq. ft home.

What is a building envelope?

A building envelope is the physical separator between the conditioned and unconditioned environment of a building including the resistance to air, water, heat, light, and noise transfer. It includes all exterior walls, the roof and foundation.

DRAFT SEAL

Helps to reduce drafts, vapors and sound transmissions through exterior walls

Material: PVC, foam gaskets

Certifications: UL Listed

Features: Works with all standard non-metallic boxes. Green Ring easily identifiable after dry wall install. Eliminates need for caulking & sealants. Complies with the IECC & LEED for envelope sealing. Meets NEMA OS 4 standards.

Notes: Includes foam gaskets to cover wire ports

SHARK TOOTH

The only box that cuts its own hole!

SharkTooth was designed with the electrician in mind for installing over head lighting, wall sconces and smoke detectors. A built-in hole saw creates the perfect sized hole every time, while also making it easy to center-on-center mark. Raised mounting rings with center hole are located inside the back wall of the box for surface mount installations, basement or attic studs.

- Quick and easy to install
- Mounting hole spacing accommodates 3/0 and 4/0 fixtures
- Supports fixtures up to 6 lbs.

With a wide range of sizes and styles, Madison has the flex and liquid-tight conduit that you need. From trade sizes ranging from 3/8" to 4", no job is too big or too small. Made from the highest quality steel, aluminum and PVC, Madison's flex and liquid-tight conduit come through each and every time.
